# PRODUCT SPECS

Jim Green Footwear is as hard, resilient and tough as Africa. The look, style and fit is carefully fashioned to embrace the personalities of those that wear them. The Footwear is perfect for any occasion and designed to fit around an active lifestyle.

**A** Boots are made from 2.2mm leather with heavy duty hooks and eyelets

**B** Ankle padding for excellent support, comfort and protection

**C** Steel toe caps are ISO 20345 approved

**D** All styles have a steel shank and an insole board that offers extra support and stability

**E** 2mm braided nylon cord is used for double stitching

**F** Pure rubber sole

All these processes are carefully molded together, making Jim Green South Africa's most successful brand of outdoor footwear.

### BS3 HIGHLANDER STEEL TOE CAP

- **SABS APPROVED – ISO 20345 SB**

#### FEATURES

# PRODUCT CARE

- The key to getting maximum usage from your pair of Jim Green's is to take good care of them. The best way to preserve your footwear is through regular polishing and correct care.
  - Do not dry near a fire, heater or in direct sunlight – when boots are wet stuff with newspaper, shape and leave to dry naturally. When dry, polish.
  - We recommend a bees wax or any natural shoe polish found at your local store. Regular polishing also seals the leather, aiding the boots water resistant qualities.
-
