

**'DEAR FEET,
LET'S TALK
ABOUT
SAFETY.'**

BATA INDUSTRIALS CATALOGUE

THE SAFETY SHOE

SOUTH AFRICA

THE SOLE OF BATA

Established in a small town in Czechoslovakia in 1894, Bata experienced rapid growth thanks to its founder, Thomas Bata.

Under his guidance and vision, the small family business successfully expanded into a large-scale shoe manufacturer. Following his principles, the company continued its upward trajectory and grew into an international business and formed a prominent global footprint by the end of the twentieth century.

Today, Bata is recognised as an iconic brand and a market leader in the modern footwear industry serving a million customers in over 60 countries every day.

STEP INTO BATA

SOUTH AFRICA

Nestled within the land, beneath our beautiful African sky and a stunning natural backdrop, our factory has called Loskop in KwaZulu-Natal home since 1977.

The Loskop factory produces our amazing Toughies School Shoes as well as a variety of gum boots and safety shoes at an average of 300 000 shoes per month. That's an astounding 3,300 000 shoes a year!

Bata's production success is attributed to our South African people and by locally producing many of our shoes, we have helped boost both the local and national economies whilst providing our customers with better value for their money.

TESTIMONIALS

"This company has done a lot for me, since my children lost their father in January 2007, they were too young, but the Bata factory has helped me and now I have 4 graduates."

KB Zuma - Finishing Department

"I have a Wits University graduate and a graduate from Damelin because of this factory, and now they are all working. I have built a nice and warm home for my children."

RN Mazibuko - Injection Department

"This company has done a lot for me, helping me build my own house and at the same time assisting in building other houses as well."

TM Dlamini - Injection Department

LOSKOP, KWAZULU-NATAL, SOUTH AFRICA

BUILDING LOCAL

With a firm belief in the power of the people, Bata turned to South Africans to fuel growth and success by investing in the community of Loskop. By focusing our factory operations locally, Bata boosted the local economy and created essential job opportunities by successfully employing, on average, 92% of the community.

We are also passionate about education, helping people and actively assisting the people of Loskop through various community initiatives. By investing in the Loskop community, Bata is able to continue creating quality shoes for our local and international markets whilst assisting in the growth and success of a local community.

SAFE SHOES FOR SAFE FEET

This SABS approved economy shoe is built for safety with the notion of caring for 'FEET FIRST'. The aim is to bring ease and comfort to every enterprise and every worker.

The shoe encompasses comfort, protection and affordability for the necessary tasks of its worker.

Articles have been manufactured to the SANS 20345 (ISO 20345) and SANS 20347 standards.
