

Dromex

**WORKWEAR &
PERSONAL PROTECTIVE
EQUIPMENT**

**FOR THOSE WHO WORK BEYOND
THE ORDINARY**

PPE & WORKWEAR FOR SAFETY ANYWHERE.

Dromex is Africa's leading PPE & Workwear wholesaler dedicated to supplying quality protective products and workwear to employers and workers throughout industries around the world.

Originally founded as Industrial & Marine Sealing Systems (IMSS) in 1998 by our CEO, Stel Stylianou and operating from a 750m² warehouse, the Dromex range was strategically developed and has grown into one of South Africa's most trusted PPE brands.

Our new warehouse located in Cornubia Logistics Park now spans over ten's of thousands of square metres and features the latest technology in storage, receiving & dispatch facilities to ensure that we have large volumes of internationally accredited PPE & Workwear in stock at all times and promptly dispatch in both quality & quantity.

As active members of various SABS technical committees, a member of SAPEMA and SAIOSH you can be assured that our PPE & Workwear comply with local industry standards and regulations.

Our PPE Specialists are continually up to date with the latest EN, ANSI, NFPA and additional international standards and are equipped to advise you on PPE & Workwear that is fit-for-purpose to keep the men & women who rely on protective equipment and clothing as comfortable & safe as possible.

QUALITY STANDARDS

We carefully select our suppliers, which ensures that we import products certified to international standards from ISO accredited companies around the world.

SERVICE

Our service and fiercely competitive pricing strategies result in often unparalleled levels of value for money and drive our quality PPE products through a loyal group of large and medium distributors throughout South Africa and Africa.

ADVICE & TRAINING

With extensive experience in various fields requiring PPE, we're able to provide on-site PPE evaluations, advice and training. Technical back up and distributor training is available at Dromex support centres in Durban, Johannesburg, Port Elizabeth, Cape Town & Richards Bay.

INNOVATION

New Products and innovations are continually being added to our range, and quality is reviewed on an on-going basis ensuring we offer the best possible specialist services to meet the ever changing demands of the PPE market.

We believe that all employees in any work environment are entitled to maximum safety protection and that employers should not have to compromise on the quality of the PPE products they provide for their staff.

EVERY WEAR CORPORATE CLOTHING RANGE

The Dromex corporate clothing range will take you from the office to the golf course and is equally perfect for administrative, promotional, warehouse and delivery personnel.

We've ensured quality in every detail - every cotton thread, every button, every metre of fabric has been meticulously chosen with the user in mind to provide comfort & value.

Manufactured with the latest technology in pattern making, cutting & sewing automation, we are able to provide consistency in our clothing fit & durability.

We're committed to supplying quality without compromise and this promise is at the forefront of every Dromex garment.

Dromex

Dromex

LADIES STRETCH DENIMS

CODE: DWL-DENIMJEAN

- 75% Cotton, 23% Polyester, 2% Spandex, 10.5oz indigo blue denim
- Mid-rise waistline, modern cut & contoured fit
- Double needle stitching on inlegs, pockets, zip, back yoke & back rise
- Two front pockets, money pocket & two back pockets
- The natural fibres make this garment comfortable & breathable
- Suitable for casual & smart/casual use

Sizes: 28 - 50

Dromex

GOLF SHIRTS

CODE: DW-GOLFER

- 100% Polyester, 165gsm fabric
- Pique knit
- Lightweight
- Breathable
- Durable & retains colour
- High tear resistance
- Suitably paired with Dromex Chinos & Denims
- Available in six colours

Sizes: XS - 5XL

Available colours:

White

Grey

Red

Royal Blue

Navy

Dromex

T-SHIRTS

CODE: DW-TSHIRT

- 100% Combed Cotton, 165gsm fabric
- Premium round neck t-shirt
- The natural fibres make this garment comfortable & breathable
- Suitable for use with Dromex Denims & Dromex Conti Suits
- Available in eight colours

Sizes: S - 3XL

DENIM JEANS

CODE: DW-DENIMJEAN

- 100% Cotton, 12oz indigo blue denim
- YKK Brass zip, Dromex closure button & rivet studs on all corners of front pockets
- Double needle topstitched inleg, back yoke & back rise
- Two front pockets, money pocket & two back pockets
- All pockets have double needle topstitching
- The natural fibres make this garment comfortable & breathable
- Suitable for casual & smart/casual use

Sizes: 28 - 50

STRETCH CHINOS

CODE: DW-CHINOS

- 98% Cotton, 2% Elastane - 220/230gsm
- Side swing pockets with a right side coin pocket
- Comfortable, lightweight & breathable
- Suitable with Dromex Formal Shirts & Golf Shirts
- Durable and perfect for everyday use

Sizes: 28 - 50

Available colours:

Stone

Navy

Black

LEATHER BELT

CODE: DW-BELT

- Premium grain Buffalo leather belt
- Zinc alloy buckle
- Suitably worn with all Dromex chinos & denims

Sizes: S - 3XL

NEW

Dromex

ACTIVE BODY WARMER

CODE: DB-STBW-A

- Unisex, black thermal body warmer
- Outer: 40D Nylon fabric
- Inner: 220gsm Cotton with 190T Taffeta
- Lightweight with metal zip front closure
- Two waist pockets with zip closure & an internal pocket on the right breast

Sizes: S - 3XL

Dromex

HARDBODY BODYWARMER

CODE: DB-STBW-H

- Unisex, navy, padded, thermal body warmer
- Outer: 65% Polyester/35% Cotton
- Inner: 100% Polyester with 190T Taffeta
- Lightweight with concealed front zip & storm flap button closure
- Four external pockets with storm flaps & an internal pocket on the left breast

Sizes: S - 3XL

Dromex

SOFTSHELL JACKET

CODE: DB-SS

- Stylish, lightweight, thermal & water resistant jacket with a micro polar fleece lining
- High collar with reverse zip closure & adjustable cuffs
- Outer: 125g laminated, 95% Polyester, 5% Elastane
- Inner: 100% Polyester Micro Polar Fleece 190g

Sizes: XS - 5XL

FOR THOSE WHO WORK BEYOND THE ORDINARY

We know that it's tough to leave your family and walk bravely towards hazards you can't control. How it feels to be one step away from danger every day. That is why Dromex believes that all employees are entitled to maximum protection without compromise.

From essential PPE to our state-of-the-art ARC protection, it is our responsibility to supply products that will deliver on this promise. And it's not something we take lightly.

NEWS

DROMEX GLOBALE: THE NEW ERA OF WORKWEAR

At Dromex we're committed to providing customers with only the best PPE and Workwear, and this means we're always looking at new ways of improving our range.

To achieve our goal of being Africa's premier PPE supplier, we've built our own 8000m² state-of-the-art manufacturing facility at the new intermodal Keystone Park hub in Hammarsdale to ensure we deliver on that promise.

Dromex Globale is an SABS approved facility, dedicated to manufacturing all Dromex workwear at competitive prices with uncompromising quality, conforming to the highest standards.

Our workwear factory is BBBEE Certified and successfully provided 500 jobs at commencement with an additional 600 jobs within the following 18-36 months.

The in-house training facility endeavours to upskill the youth of Hammarsdale resulting in an empowered workforce.

Designed with the stringent needs of local and international markets in mind, Dromex Globale will change the way we supply workwear.

THE FUTURE OF PPE BEGINS TODAY

Dromex believes that all employees are entitled to maximum protection and that employers should never have to compromise on the quality of the personal protective products they supply their staff.

And with our new Dromex Globale manufacturing facility, you can be sure you're dealing with a company that puts safety first.

WORKWEAR STANDARDS

SABS is a statutory body that was established in terms of the Standards Act. These standards, **SANS** (South African National Standards) promote quality in connection with commodities, products and services. SABS mark bearing products are made under a permit from the SABS for specific products made to SANS standards by a registered manufacturer and include quality audits and verification.

SANS 434: This standard specifies requirements for the material, cut, make and trim of boilersuits, two-piece workwear suits, bib and brace overalls and coats and jackets (unlined) but does not cover garments designed for the protection against specific hazards. This covers the materials, workmanship, styles, sizes, makeup of the suits, stitches & seams.

SANS 1387: South African National Standard woven cotton and similar apparel fabrics. This covers 11 types of fabric, however the parts 1 to 4 are relevant to the workwear.

Part 4 is for cotton jean and drill fabrics.

J54 - Jean material with a 2/1 twill weave, 220g/m² minimum.

D59 - Drill material with a 4/1 satin weave, 270/m² minimum.

SANS 1423: Part 1 is for performance requirements for textile fabrics of low flammability. The standard covers the flammability performance requirements for four classes of washable apparel fabric, each class being divided into three flammability performance categories. NOTE The use of certain fabric combinations, trims, accessories and sewing threads that are not compatible can have an adverse effect on the flammability performance of a garment.

Fabric Class:

Class A: Capable of withstanding the required industrial or hospital laundry processes given in SANS 10146

Class B: Capable of withstanding wash treatments at temperatures of up to 95 °C

Class C: Capable of withstanding wash treatments at temperatures of up to 60 °C

Class D: Capable of withstanding wash treatments at temperatures of up to 40 °C

Flammability Category:

Category 1: The fabric does not ignite within a given time period.

Category 2: The fabric ignites within a given time period but the flame spread ceases within a specified distance.

Category 3: The fabric ignites within a given time period and might continue to flame but at a rate of flame propagation that is within a specified limit.

SANS 724: Personal Protective Equipment & Protective Clothing against thermal hazards of an electric Arc.

Design, selection and performance requirements of electric arc resistant clothing and equipment for the protection of persons against the thermal hazards of an electric arc, which could occur during operating or working on or near electrical equipment in the workplace.

SANS 61482 Live working, Protective clothing, against the thermal hazards of an electric arc. Part 1 is IEC 61482-1-1 determination of the arc rating (ATPV or EBT50) of flame resistant materials for clothing. IEC 61482-1-1 Method A is identical to ASTM F1959, with the exception of different laundry preconditioning requirements.

SANS 50471 EN 471 High-visibility warning clothing for professional use - test methods and requirements.

NFPA: The NFPA (National Fire Protection Association) is a United States trade association, albeit with some international members, that creates and maintains private, copyrighted standards and codes for usage and adoption by local governments.

NFPA 1975 Provisions apply to design, performance, testing and certification of non-primary protective work apparel and the individual garments comprising work apparel.

Specifies criteria for thermally stable textiles that will not rapidly deteriorate, melt, shrink, or adhere to the wearer's skin, and also provides optional requirements and tests to verify flame resistance, odour resistance, water resistance and insect repellancy.

NFPA 70E Safe work practices to protect personnel by reducing exposure to major electrical hazards. NFPA 70E helps companies and employees avoid workplace injuries and fatalities due to shock, electrocution, arc flash, and arc blast.

The Standard includes guidance for making hazard identification and risk assessments, selecting appropriate PPE, establishing an electrically safe work condition and employee training.

NFPA 2112 This standard protects workers from flash fire exposure and injury by specifying performance requirements and test methods for flame-resistant fabric and garments. Criteria cover design, construction, evaluation and certification of flame-resistant garments for use by industrial personnel, with the intent of not contributing to the burn injury of the wearer, providing a degree of protection to the wearer and reducing the severity of burn injuries resulting from short-duration thermal exposures resulting from accidental exposure to flash fires.

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies, ISO member bodies. International Standards are carried out through ISO technical committees and each member of the body has the right to be represented.

ISO 13688 This International Standard specifies general performance requirements for ergonomics, innocuousness, size designation, ageing, compatibility and marking of protective clothing and the information to be supplied by the manufacturer with the protective clothing. This International Standard is only intended to be used in combination with other standards containing requirements for specific protective performance and not on a stand-alone basis.

ISO 6530 This International Standard specifies a test method for the measurement of indices of penetration, absorption and repellence for protective clothing materials against liquid chemicals, mainly chemicals of low volatility. Two levels of the potential performance of materials are assessed by this method of testing to meet with possible requirements for protection against:

a) deposition on the surface of a material, at minimal pressure, of spray droplets up to coalescence or occasional small drips;

b) contamination by a single low-volume splash or low-pressure jet, allowing sufficient time to divest the clothing or take other action as necessary to eliminate any hazard to the wearer from chemical retained by the protective garment, or, in circumstances where pressure is applied to liquid contaminants on the surface of the clothing material, as a result of natural movements of the wearer (flexing of contaminated areas of clothing at arms, knees, shoulders) and contact with contaminated surfaces (e.g. walking through sprayed foliage). The tested chemicals for the South African market are: HNO₃ (Nitric Acid), HCl (Hydrochloric Acid), H₂SO₄ (Sulphuric Acid) and NaOH (Sodium Hydroxide).

ARC

INNOVATION

INTRODUCING THE DROMEX ARC RANGE

MEETING THE HIGHEST STANDARDS

Dromex believes in uncompromising safety, so we've insisted that the integrity of our specialist ARC range also passes the most stringent garment tests in addition to the fabric tests.

We're proud to be associated with the leading standards authorities locally and internationally enabling us to produce certified ARC workwear.

These standards include:

- IEC 61482-1-1 • IEC 61482-1-2 • NFPA 70E • NFPA 2112
- SANS 724 • ASTM F1959 • ASTM F2621-12
- EN 11611:2015 • EN 11612:2015 • EN 61482-1-2:2014

Through years of consulting with experts, testing fabric combinations and working with world-leading testing facilities, we are proud to bring the Dromex ARC range of workwear and PPE to the global stage.

Dromex is committed to developing quality products, that effectively mitigate risk, which extends to our specialist offering - specifically our ARC range which has been designed to reduce the risks associated with hazardous industries, where 2nd & 3rd degree burns can occur.

Our ARC workwear is manufactured locally using our custom Dromex A.P.T™ (Arc Protection Technologies) fabric and is certified to the highest local and international standards.

Each garment is rated to varying degrees for specific environments and conditions and our ARC range includes a number of styles and accessories for various industries.

Dromex ARC workwear and PPE is suitable during any work with or within the vicinity of industrial electrical panels switch rooms, substations and utilities power generators.

THE SAFETY IS IN THE DETAIL

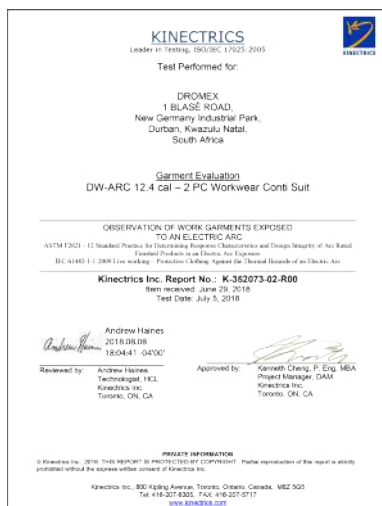

When it comes to safety, the smallest detail can make a difference. Through extensive research, development, and testing, we've created an ARC range that's every bit as comfortable and practical as it is safe:

- Inherent flame-retardant thread
- Triple needle stitched seams
- Transfer print & embroidery logos
- Flame-retardant Velcro
- Double needle stitched FR reflective tape

At Dromex we believe that all employees are entitled to maximum safety protection and that employers should never have to compromise on the quality of protective equipment they supply their staff.

Our Arc range ensures that we deliver on that promise.

Q&A

What is an Arc Flash?

An Arc Flash is a potentially fatal explosion of extreme light & radiant heat as a result of a short circuit on an electrical panel that can be caused by dust, dropping tools, accidental touching, condensation, corrosion or a faulty installation.

An Arc Flash can reach temperatures of up to 20 000°C and can cause permanent and often deadly injuries.

What are the hazards and dangers of an Arc Flash?

For the worker, injuries caused by an Arc Flash can be severe depending on the distance of work, the incident energy and the duration of the Arc Flash.

Possible injuries include second & third degree burns from the extreme heat of the blast, burns from airborne molten metal, metal oxides & vaporised copper, concussion & head injuries, hearing impairment and damaged eyesight.

An Arc Flash can also cause fire in the surrounding work areas.

How is Arc Flash energy measured?

Arc Flash energy is measured in calories/cm².

A calorie is the energy required to raise one gram of water to one degree celcius at one atmosphere. Secondary burns can occur from just 1.2cal/cm².

What is the accepted worker incident energy level?

Industry standards and government agencies agree that 1.2 to 2.0cal/cm² is an acceptable worker incident energy level.

The exposure to arc radiant heat energy has the possibility of causing 2nd degree burns of the epidermis and shows as painful red skin or blisters.

Controlling worker's incident energy reduces the severity of burn injuries and saves lives. Methods used to reduce worker incident energy levels are to reduce Arc Flash current and clearing time, move the worker farther from potential Arc, wear correct Arc Thermal Performance Value (ATPV) & Flame Resistant (FR) clothing system, and change the work method to a lower Arc incident energy.

UNDERSTANDING ARC WORKWEAR

FR COTTON vs INHERENT FABRICS

> FLAME RETARDANT COTTON FABRICS:

FR Cotton fabrics have had flame retardants engineered into the fabric to create flame resistance thereby producing fabrics that have guaranteed flame retardancy for the life of the garment.

> INHERENT FLAME RETARDANT FABRICS:

'Inherent fabrics' consist of synthetic fibre that do not require additional FR chemical treatments - each fibre is 'inherently' flame retardant.

All FR fabrics (inherent & treated) are engineered to prevent ignition. While the fabrics are essentially different, technological advancements and development means that the efficacy of both fabrics are very similar and choosing Arc workwear should be based on:

- Arc hazard & environment of use
- Performance & certifications
- Comfort & quality
- Durability
- Value & availability
- Brand reputation

Did You Know?

Dromex A.P.T™ FR Cotton Fabric has passed "Red Metal" testing which offers additional bodily protection from molten metal, vaporised copper & metal oxides up to 1400°C. This offers the wearer effective protection and peace of mind.

Molten metal is a deadly hazard that can easily penetrate synthetic lightweight fabrics during an Arc Flash incident.

Sample(s) Received: 10/14/2019
Sample Description (provided by client): Dromex, Style Dromex A.P.T., 9.0 oz/yd² 305 g/m² Woven, 88% FR Cotton 12% Nylon, Navy, AAD 9.7 oz/yd² 329 g/m², ArcWear# 1911P05
Testing Date: 12/6/2019
Procedure: Testing was completed in accordance with the method identified below at ArcWear in Louisville, Kentucky.

FLAMMABILITY TESTING

When a garment is tested for flammability against the NFPA 2112 standard it has already been washed 100 times before NFPA 2112 tests are applied.

At Dromex we believed in the superior quality of our fabric and took this test one step further.

Our Dromex A.P.T™ fabric was tested against the NFPA 2112 standard and passed after 200 washes.

ARC WORKWEAR LIFESPAN

The lifespan of an Arc garment is dependent on many factors such as wash care, storage between use and wear and tear during use.

E.g. If the garment has been in use for 3 weeks and a worker is exposed to an Arc Flash incident the workwear and PPE needs to be replaced therefore the lifespan of the garment has ended. Likewise if Arc workwear & PPE is damaged during use, it needs to be removed from service and replaced immediately.

Dromex A.P.T 200 Wash Certificate

ASTM D3776/D3776M						
Standard Test Method for Mass per Unit Area Fabric Weight-Option C Small Swatch						
Preconditioning:	200 cycles of washing and drying as specified in sec 8.1.3 of NFPA 2112-18					
Conditioning:	ASTM D1776					
Sieve(s) Included:	No					
Fabric Mass (oz/yd ²):	10.18					
Fabric Mass (g/m ²):	345

ARCWEAR SHALL NOT BE LIABLE FOR ANY INDIRECT, INCIDENTAL, SPECIAL, CONSEQUENTIAL, PUNITIVE, OR EXEMPLARY DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR PERSONAL INJURY, BODILY INJURY, PROPERTY, LOST PROFITS, GOOD WILL, USE, DATA, OR OTHER INTANGIBLE LOSSES WHETHER DERIVED FROM THIRD PARTY CLAIMS OR LOSSES OF ANY NATURE WHATSOEVER OR OTHERWISE, REGARDLESS OF WHETHER ARCWEAR WAS ADVISED OF THE POSSIBILITY OR LIKELIHOOD OF SUCH DAMAGES OR COSTS OCCURRING, AND WHETHER SUCH LIABILITY WAS BASED UPON TORT, WARRANTY, NEGLIGENCE, STRICT LIABILITY, CONTRACT, PRODUCT LIABILITY, OR ANY OTHER CLAIM AT LAW OR IN EQUITY. THE LIMITATIONS OF LIABILITY SET FORTH HEREIN SHALL BE APPLICABLE TO AND SHALL INURE TO THE BENEFIT OF ARCWEAR AND ITS OFFICERS, DIRECTORS, EMPLOYEES, AGENTS, ATTORNEYS, AFFILIATES, AND PARTNERS. TO THE EXTENT PERMITTED BY APPLICABLE LAW, CUSTOMER IRREVOCABLY WAIVES ANY STATE, FEDERAL, OR LOCAL LAW, REGULATION, OR STATUTE THAT WOULD OTHERWISE LIMIT OR PROHIBIT LIMITATIONS OF OR GENERAL RELEASES OF LIABILITY. THE LIMITATIONS SET FORTH HEREIN ARE INTENDED TO CONFORM TO THE FULLEST EXTENT POSSIBLE WITH ANY APPLICABLE LAW, REGULATION, OR STATUTE PROHIBITING OR LIMITING THE EXCLUSION OR LIMITATION OF DAMAGES OR THE DISCLAIMER OF WARRANTIES AND REPRESENTATIONS.

ARC THERMAL PROTECTION VALUE

ATPV is the embroidered or printed markings on all Arc workwear & PPE.

ATPV is measured in cal/cm² and is defined as the maximum incident heat energy that a fabric can absorb and lessen the injury against a 2nd or 3rd degree burn.

For example, if a worker has the potential to be exposed to an incident where the heat energy level is less than 4.0 cal/cm², the required ATPV clothing & PPE is a minimum of 4 cal/cm².

HEAT ATTENUATION FACTOR (HAF)

HAF refers to the amount of heat blocked by the FR fabric. Though a fabric may be flame resistant, it may not block all of the heat to which it is exposed. An HAF of 85% means that it will block 85% of the heat the fabric encounters. This applies to a short burst of heat - usually less than one second. In the event of prolonged heat exposure, the HAF would be lower.

Note: Synthetic fabrics generally have a lower HAF than Cotton FR Fabrics.

ARC WORKWEAR & PPE SELECTION

HAZARD / RISK CATEGORY	CLOTHING DESCRIPTION RECOMMENDED	MINIMUM REQUIRED ARC RATING OF PPE CAL/CM ²
 HRC 1	Arc Rated FR shirt & FR pants or coverall	4
 HRC 2	Arc Rated FR shirt & FR pants or coverall	8
 HRC 3	Arc rated FR shirt or FR pants or FR coverall and arc flash suit selected so that the system arc rating meets the required minimum	25
 HRC 4	Arc rated FR shirt or FR pants or FR coverall and arc flash suit selected so that the system arc rating meets the required minimum	40

NOTE: Energy / Incident Analysis & Calculation assessments are available on request to ensure correct Arc Workwear & PPE selection according to the arc hazard present.

100CAL ARC SUIT BIB & BRACE, JACKET & HOOD

HOOD: ASTM F2178-12
GLOVE: ASTM F2675

- ATPV 100cal/cm²
- Dromex A.P.T Fabric - 88% Cotton, 12% Nylon
- Triple layer construction: 14oz outer, 250gsm meta aramid FR mat lining & 14oz inner
- Inherent flame retardant thread throughout
- Fully triple needle stitched garment
- Concealed YKK Vizlon zip on jacket
- Flame retardant hook & loop closures
- Flame retardant knitted rib cuffing
- cal/cm² Rating embroidery on hood, jacket, bib & brace and gloves

Hood:

- Back flap with hook & loop closure for built-in fan/air system
- Flame retardant hook & loop closures
- Dromex BSD 100cal/cm² Arc Visor with *Real View Technology*
- Integrated fresh air arc flash ventilation system for cooling

Sizes:

- Jackets: S - 5XL
- Bib & Brace: S - 5XL
- Gloves: S/M & L/XL (*see pg 40 for more info*)

Suitable Use:

- Substations & switchrooms
- Utilities & power generators
- Industrial electrical maintenance & installations
- Mining, chemical & refineries

- Flame retardant thread throughout
- Flame retardant knitted waist band
- cal/cm² Rating embroidery on left leg
- Suitably worn under any Dromex Arc garment

Sizes: S - M
L - XL

Suitable Use:

- Substations & switchrooms
- Utilities & power generators
- Industrial electrical maintenance & installations
- Mining, chemical & refineries

FLAME RETARDANT SOCKS

CODE: DF-9162-CH-L

- Certified to EN ISO 13688:2013+A1:2021, EN 1149-5:2018
EN ISO 14116:2015
- Inherent LENZING™ FR fiber
- Anti-static
- Reinforced heel & toe for durability
- Thermally balanced & odour free
- Will not burn when exposed to heat & flame
- 48% Wool, 44% LENZING™ FR, 6% Polyamide, 2% Elasthane

Sizes: Large (8 - 11)

Suitable Use:

- Petroleum service industry
- Petrochemical industry
- Oil & gas industry
- Electrical & gas utility
- Steel mills
- Fighter pilots

ARC VISION KIT

CODE: DV-AVG28

IEC 61482-1-2, NFPA 2112, NFPA 70E, ASTM F1959,
EN 11611:2015, EN 11612:2015, EN 61482-1-2:2014

- Consists of ATPV 28 cal/cm² Arc Goggles, 31 cal/cm² Arc Balaclava and Arc Pouch
- 88% Cotton, 12% Nylon Interlock FR Knitted Fabric, 203gsm
- Flame retardant thread throughout
- Flame retardant knitted rib cuffing
- cal/cm² Rating embroidery on left breast
- Suitably worn under any Dromex Arc garment

Sizes: S - 5XL

Suitable Use:

- Substations & switchrooms
- Utilities & power generators
- Industrial electrical maintenance & installations
- Mining, chemical & refineries

ERGOS2 ARC VISOR

CODE: ARC ERGOS3 12 / 27 & ARC ERGOS2 12-EU / 26-EU

- **Increased worker safety because of REAL VIEW of work environment.**
- New generation of face protection against the thermal hazards and impact of an arc flash
- Tested to EN 166 for protection against molten metals & hot solids
- Realistic colour reproduction >95%
- Protection against high-speed particles: medium energy impact (B)
- Extended length visor & transparent chin guard
- Optimised weight balance & no time limit on durability
- Fitted with a universal bracket for use with front brim arc rated hard hats according to EN 50365 or EN 397 standards
- Available in 12 cal/cm² & 27 cal/cm²

AVAILABLE IN EURO HELMET SLOT MOUNTED OPTIONS:
12 cal/cm² & 26 cal/cm²

The lens makes the difference!

Dromex Visor with
BSD Real View Technology

Other face shields - green tinted visor

ERGOS INTEC ARC HELMET

CODE: ARC ERGOS 28

- ATPV 28 cal/cm²
- Insulated helmet with integrated retractable visor & chin protection
- Provides safety against thermal hazards of an electric arc & projected droplets of molten metal
- Electrical insulation 1000V AC & 1500V DC
- Conforms to EN 166:2001, EN 170:2002, EN 50365:2002, EN 397:2012 + A1:2012, GS-ET-29:2011 & ASTM F2178-17b
- Suitable for use by electricians during work on live equipment and work at heights on electrical connections

ARC HARD HAT

CODE: ARC HHSG 18

- Electric hard hat offering dielectric protection up to 20 000 volts
- 4-point quick fit suspension
- Adjustable Fast-Trac III ratchet
- Fixed stitched sweat band
- Easily integrated with face and hearing PPE
- Suitable for use in electric / utilities & manufacturing industries

NEW

INTEC LED HEADLAMP

CODE: DH-INTECHL

- Cordless, rechargeable, dual light headlamp with self adhesive mounting clip
- Designed for use with the Dromex ErgoS Intec Arc Helmet (Code: ARC ERGOS 28 - Pg. 38)
- 7 Light modes LED white spotlight & COB red & white flood light
- 60 degree adjustable tilt
- Light range up to 100 meters
- Cordless with two large button switches for ease of use when wearing gloves
- IP44 water resistant up to 1 meter for 30 mins & dust proof rated
- Versatile headband for recreational use
- 1.5 - 3.5hr run time depending on light mode
- Slimline & lightweight
- USB to USB-C fast charging

Suitable Use:

- Utilities & Power Generation
- Substations & Switchrooms
- Recreational purposes (hiking, camping, riding)

ARC BALACLAVA

OEKO-TEX®

NFPA 70E & NFPA 2112

- 100% Meta-Aramid
- Single layer: 203gsm fabric
Double layer: 406gsm fabric
- Flame retardant thread throughout
- Lightweight & breathable

Suitable Use:

Fire caused by -

- Chemicals
- Petrochemicals
- Utility/Electrical work

Sizes: One size fits all

DW-ARC9.9-BAL-S

- ATPV 31 cal/cm²
- 88% Cotton, 12% Nylon Interlock FR Knitted Fabric, 406gsm
- Double layer construction for insulation
- Pleated crown area for snug fit
- Lightweight & breathable

Sizes: One size fits all

Suitable Use:

- Mining
- Petrochemicals
- Utilities & Power Generation
- Substations & Switchrooms

16.8CAL ARC FLASH DIPPED GLOVE

CODE: NE423AF

EN 388

2341C

EN 407

41324X

ASTM

F2675/F2675M-13

D 3776:2013 Option C

- 42.3cal/cm² Arc rated palm & 16.8cal/cm² arc rated back
- Excellent grip in wet, oily & dry environments
- High dexterity
- High resistance to snatch, tear, cut, abrasion & heat
- Basic chemical oil stability
- Seamless knitted aramid fibre glove with a textured Nitrile micro foam & neoprene coated palm
- 13g Aramid flexible knit fabric
- Extended 16cm cuff

Sizes: 7 - 13

Suitable Use:

- Power & utility companies
- Installation, maintenance & repairs

51CAL LEATHER ARC GLOVE

CODE: CA420

EN 388

3X33D

EN 407

X1XXXX

ASTM

F2675/F2675M-13

- 51cal/cm² Arc rated leather gloves
- High cut level D protection
- High abrasion resistance
- High resistance to snatch, tear, cut & heat
- Multi-layer protection provides flexibility, comfort & excellent insulation
- Leather glove lined with Aramid fibre
- Kevlar stitching
- Shirred extended 16cm cuff
- Cow split leather 1mm

Sizes: 8 - 11

Suitable Use:

- Power & utility companies
- Installation, maintenance & repairs of high voltage equipment

55CAL ARC SWITCHING GLOVES

CODE: DG-ARC70

OEKO-TEX®

NFPA 2112, NFPA 70E, ASTM F2675, IEC 61482-1-1,
IEC 61482-1-2, EN 11611, EN 11612, EN 61482

- ATPV 55cal/cm²
- Dromex A.P.T Fabric - 88% Cotton, 12% Nylon
- Flame retardant glove lined with meta aramid mat lining
- Inherent FR stitching throughout
- Glove thickness: 2.7mm
- Elasticated shirred glove for comfort

Sizes: S/M & L/XL

Suitable Uses:

- Substations & switchrooms
- Utilities & power generators
- Industrial electrical maintenance & installations

100CAL ARC SWITCHING GLOVES

CODE: DG-ARC100

OEKO-TEX®

NFPA 2112, NFPA 70E, ASTM F2675, IEC 61482-1-1,
IEC 61482-1-2, EN 11611, EN 11612, EN61482, SANS 724

- APTV 100cal/cm² mitt-style glove
- Dromex A.P.T Fabric - 88% Cotton, 12% Nylon
- Triple layer construction: 14oz outer, 700gsm meta aramid mat lining & 14oz inner
- Inherent FR stitching throughout
- Elasticated shirred glove for an ideal fit
- cal/cm² Rating embroidery on cuff

Sizes: S/M & L/XL

Suitable Uses:

- Substations & switchrooms
- Utilities & power generators
- Industrial electrical maintenance & installations

NEW

40CAL METAL FREE LEATHER BELT

CODE: DW-ARCBELT

Conforms to ASTM F2621-12

- APTV 40 cal/cm²
- Metal-free, flame retardant, full grain cow leather belt
- Flame retardant adjustable hook & loop closure
- Flame retardant thread throughout
- Suitably worn with all Dromex Arc pants or jeans

Sizes: S - 3XL

Suitable Use:

- Substations & switchrooms
- Utilities & power generators
- Industrial electrical maintenance & installations

55CAL ARC BLANKET

CODE: DW-ARCBLANK

NFPA 70E & NFPA 2112

- Dromex A.P.T Fabric - 88% Cotton, 12% FR Nylon
- Two-layer panel system
 - > 14 oz Layer 1
 - > 14 oz Layer 2
- Inherent FR thread throughout
- Heat transfer print & FR APTV 55cal embroidery
- Ten double-layer loops for securing in place
- Centralised cable strap with Velcro/zip strap
- Provides protection against arc blast hazards during electrical work in confined spaces

Sizes:

- Small: 1.5m x 2.4m
- XLarge: 2.5m x 4m

Suitable Use:

- Substations & switchrooms
- Utilities & power generators
- Industrial electrical maintenance & installations
- Mining

ARC FLASH TREAD SAFETY BOOT

CODE: DF-FLASH

NRCS/9002/217251/0228

- Conforms to EN ISO 20345:2011
- Water resistant full grain cow leather upper
- Slip resistant outsole, SRC
(Slip resistance on ceramic tile floor with NaLS & on steel floor with glycerine^{^c})
- Kevlar midsole protects from penetrating objects & heat
- Energy absorbing heel
- Removable insole
- Oil resistant
- Contact heat resistant outsole at 300°C for 60 seconds
- Composite toecap is impact resistant up to 200 ± 4J
- Cleated outsole for additional traction
- Dual velcro closure strap design for ease of use with gloves

Sizes: 3 - 13

Suitable Use:

- Arc flash & flash fire potential
- Manufacturing (incl. computer equipment)
- Refineries

BOLT BOOT

CODE: DF-BOLT
NRCS/9002/217251/XXXX

- Conforms to EN 20345:2022
- Water resistant, full grain cow leather upper
- Protection from electrical hazard risks of 18kV in accordance with the ASTM F2413-18 standard
- Slip resistant outsole, SR (Slip resistance on ceramic tile floor with glycerine^c)
- Kevlar midsole protects from penetrating objects & heat
- PU / Rubber outsole heat resistant outsole at 300°C for 60 seconds
- Fiberglass toecap is impact resistant up to 200 ± 4J
- Removable and breathable PU and Memory Foam insole for superior comfort
- Metal-free, lace up ankle boot

Sizes: 4 - 13

Suitable Use:

- Arc flash & electrical hazards
- Manufacturing

INNOVATION

POSEIDON 220 FR PROTECTION BY DROMEX

Poseidon 220: Flame Retardant Overalls

Introducing our new oil & gas overalls designed and developed to meet the exacting needs and tough challenges faced by our customers and end users working within this demanding and highly specialised sector, globally.

We know how one step closer can feel too close, how it feels to face danger every day. That's why our premium Poseidon boilersuit is HRC 2 Arc Rated, anti-static, features an action back for enhanced comfort and has adjustable sleeves & legs for a secure fit and extra pockets.

This lightweight workwear includes EN approved reflective tape around the legs, arms and over the shoulders for greater visibility.

Made with our unique Dromex F.P.T™ flame retardant fabric blend, which has been engineered to provide superior protection against heat, fire, oil and gas hazards and is proudly locally manufactured at our state-of-the-art workwear facility, Dromex Globale, situated in KZN, South Africa.

Tested to leading international NFPA, ASTM, EN & IEC standards: IEC 61482-1-1, IEC 61482-1-2, NFPA 2112, ASTM F1959, ASTM F2621-12, EN 11611, EN 11612 & EN 61482.

Encompassing both European ISO/EN norms and US NFPA standards, our new Poseidon 220 range maximises stock control, enabling suppliers and distributors to participate in all major PPE regions around the world.

Therefore, Poseidon 220 fabrics offer much greater value and flexibility in diverse market conditions.

In addition to achieving these European and US technical standards, Poseidon 220 fabrics have also come with Oeke-Tex Class II level for formaldehyde requirements, distinguishing this new range as a complete and total package of Flame Retardant Fabrics, with global market application.

Innovatively developed to deliver optimum protection, the Poseidon 220 range offers the ultimate combination of superb technical and aesthetic product quality and certified standards supported with versatile delivery options and excellent customer service.

POSEIDON 220

98% Cotton, 2% Anti-static

220 gr/m²

Certified to: EN 11611, EN 11612, EN 1149, EN 61482, ASTM, NFPA

Dual certified to NPFA / EN norms

Low formaldehyde: Class II - below 73 ppm formaldehyde

Global market application

Maximized stock control: no need to have different certified fabrics for different markets, offering more flexibility.

We believe that all employees are entitled to maximum protection without compromise. From essential PPE to our specialised FIRE protection, it is our responsibility to supply products that will deliver on this promise.

FIRE & CHEMICAL BOOTS

CODE: DFB

EN 15090:2012 approved

- Lightweight firefighting boots
- Suitable against chemicals & can be worn with chemical encapsulated suits
- Has the highest chemical protection, Type 3 (fire suppression, rescue interventions including protection against chemical hazards)
- Reflective strips & trim can be seen as far as 250m away
- Rot proof inner lining

Suitable Use:

- Structural & wildland fire fighting applications
- Search & Rescue
- Aircraft fires
- Petrochemical fires

- Made of Elastomer: fireproofed NBR/CR (fireproofed nitrile/polychloroprene rubber)
- EN 15090 approved firefighting boots and Marine Fire Protection certified, used in many European countries
- 10 Year shelf life
- Composite polymer toe cap & midsole for impact & puncture protection (ladies sizes 3 & 4 ½ has a steel toe cap)
- Weight (size 8): 1900g per pair

Sizes: 3 - 11 ½

**Ladies size options available*

SAFETY WORKWEAR

LONGEVITY & CARE GUIDELINES

Safety workwear is designed to protect workers from specific hazards, but like all personal protective equipment (PPE), it has a finite lifespan that is influenced by various factors.

To ensure customers understand how long safety workwear should last, this guideline provides an in-depth explanation of factors affecting garment longevity and recommendations for maximizing the product lifespan.

FACTORS THAT INFLUENCE GARMENT LONGEVITY

► Work Environment

- **Harsh Environments:** Garments used in environments with high abrasion, sharp objects, extreme heat, or chemical exposure will wear out quicker.
- **Moderate Environments:** Garments used in less abrasive or hazardous conditions tend to have a longer lifespan.
- **Frequency of Use:** Daily, continuous use in tough conditions reduces longevity compared to occasional use in milder conditions.

► Type of Hazard

- **Thermal Hazards:** Prolonged exposure to heat or flames can degrade fabric treatments and reduce fire retardant effectiveness over time.
- **Chemical Hazards:** Contact with corrosive or reactive chemicals may weaken fibres and cause damage to seams or coatings.
- **Physical Hazards:** Exposure to sharp edges, heavy machinery, or abrasive surfaces will increase wear and tear.

► Maintenance Practices

- **Correct Laundering:** Improper washing techniques (e.g. using harsh detergents, excessive heat, or bleach) can degrade protective properties.
- **Frequency of Cleaning:** Overwashing can accelerate fabric breakdown, while infrequent cleaning may allow contaminants to damage the garment.

► Usage Patterns

- **High Wear Areas:** Knees, elbows, and cuffs experience more wear due to movement and contact with surfaces.
- **Incorrect Fit:** Poorly fitting garments (too tight or too loose) are more prone to tearing or excessive abrasion.

► Garment Design and Material

- **Material Composition:** Higher quality materials and advanced fabric technologies generally offer better durability but must still be used within their intended purpose.
- **Design Features:** Reinforced seams, knee patches, and abrasion-resistant areas help extend the garment's lifespan in demanding applications.

HOW TO MAXIMIZE GARMENT LONGEVITY

► Correct Usage

- Use the garment only for the hazards and environments it is certified to protect against.
- Avoid unnecessary exposure to harsh conditions when not required for safety.

► Proper Laundering and Maintenance

- Follow the laundering instructions provided on the garment label or care guide.
- Use mild detergents without bleach or fabric softeners to preserve protective treatments.

- Air dry or tumble dry at low heat to avoid damaging fibres or shrinkage.
- Inspect garments regularly for signs of wear, tear, or damage, and repair minor issues promptly.

► Rotating Garments

- For high-use applications, purchase multiple sets of garments to allow for rotation. This reduces constant wear on a single set, prolonging the lifespan of each.

► Fit and Storage

- Ensure proper sizing to avoid stress on seams and fabric.
- Store garments in a clean, dry, and cool location away from direct sunlight or chemicals.

UNDERSTANDING REPLACEMENT TIMELINES

There is no universal lifespan for safety garments as durability depends on the factors outlined above. Below is a general guideline:

Environment	Usage Frequency	Estimated Lifespan
Light work (office/low risk)	Occasional	12 - 18 months
Moderate work (maintenance)	Daily	6 - 12 months
Heavy work (construction/oil & gas)	Daily in harsh conditions	3 - 6 months

► Inspection Protocols

- Perform pre-use and post-use inspections for signs of wear, including tears, thinning fabric, compromised seams, or faded reflective trims.
- Replace garments immediately if protective features are compromised (e.g. fire retardant coating is worn out).

Indicators for Replacement

- Excessive fading or discoloration of fabric.
- Visible damage to high-stress areas such as knees, elbows, or seams.
- Loss of protective properties due to improper care or prolonged use.

SETTING REALISTIC EXPECTATIONS

Using the analogy of running shoes: Two workers using the same garment in different conditions will experience different lifespans. For example:

- **Worker A:** Wears the garment in a controlled warehouse setting for 8 hours/day, 5 days/week. Expected lifespan: 12 months.
- **Worker B:** Wears the same garment in an oil rig environment with abrasive surfaces and chemical exposure for 12 hours/day, 6 days/week. Expected lifespan: 3-6 months.

Customers must understand that the lifespan of safety workwear is proportional to how the garment is used and maintained.

WARRANTY AND AFTER-SALES SUPPORT

Dromex provides a warranty for manufacturing defects but does not cover wear and tear caused by general use, improper use, extreme conditions, or lack of proper care. For questions regarding garment performance, correct garment application or replacement needs, contact our Dromex customer support team.

By following these guidelines, customers can maximize the lifespan of their Dromex safety workwear while ensuring optimal protection for workers. Garments should be regularly assessed, cared for, and replaced as needed based on the unique demands of their environment and application.

HYBRID SUIT

CODE: DW-HYB-RB

- 80/20 Poly Cotton, 200gsm fabric
- Concealed DRO aluminium zip on jackets & pants
- Triple needle topstitched inleg & back rise
- Polyester for colour-fastness blended with cotton for comfort & breathability
- Left breast pocket
- Side entry pants pockets

HYBRID-RT:

- 50mm Lime/silver/lime reflective webbing tape on arms & legs

BE THE ONE WHO GETS IT DONE.

OUR NEW TECHNICAL UTILITY RANGE IS **IN STOCK** NOW!

The new versatile and multifunctional Dromex Technical Utility range has been engineered to perform so you can be the one who gets it done.

Some premium features include:

- Multifunctional custom pockets (ruler/pen pocket, mobile phone pocket and cargo pocket).
- Reflective piping on rear leg pockets, rear ankle and knee area for added visibility in dark environments.
- Hammer/tool loop.
- Seams are triple needle topstitched for added durability.
- Stress areas are bar tacked.
- Inner elasticated waist for optimum fit and flexibility with 7 belt loops.
- Reinforced canvas panels and a comfortable spacious crouch area for ease of movement.
- Available in 2 contrasting colours, Sand and Carbon.

We're committed to supplying quality without compromise and this promise is at the forefront of every piece of Dromex Workwear.

QUICK-DRY GOLFERS

**CODES: DW-HVTECH-G (HI-VIZ)
DW-TECH-G (COLOURS)**

- 100% Polyester, 140gsm fabric
- Quick dry, short sleeve collared golf shirts with button closure
- Double needle stitched cover seams
- Rib knit collar
- Side slits
- Unisex style
- Comfortable & breathable

Sizes: XS - 5XL

Suitable Use:

- Warehouses
- General work environments
- Corporate wear
- Promotional wear
- Active wear

REFLECTIVE SHIRTS

CODE: DW-HVSS / LS

100%
COTTON

- 100% Cotton, 135gsm fabric
- Reflective operational shirt
- Vented back yoke for comfort in heat
- 50mm Silver reflective tape on sleeves, around the chest & waist
- Mitred pockets have double needle topstitching
- Button closure
- The natural fibres make this garment comfortable & breathable
- Ideal with navy J54 Cargo Pants or Dromex Denims

NOTE:

- Two-tone shirts orange/navy & yellow/navy available in short sleeve & long sleeve
- Navy available in long sleeve only

Sizes: S - 5XL

Suitable Use:

- Construction
- Outdoor inspections
- Outdoor work in hot climates
- Mining

J54-RT CARGO PANTS SABS SPEC

CODE: DW-CARGO-PRT

100%
COTTON

- 100% Cotton, 220gsm fabric
- YKK concealed brass zip
- Fully triple stitched trousers
- Mitred cargo pockets with mitred flap & hook & loop closure
- Right cargo pocket includes cell phone division
- 50mm Silver reflective tape on legs
- The natural fibres make this garment comfortable and breathable

Sizes: 26 - 52

Suitable Use:

- Construction
- Logistics
- General purpose

ACID RESISTANT CONTI SUIT

CODE: DW-ACID

Protection from the following chemicals:
HNO₃, HCl, H₂SO₄ & NaOH

- 80/20 Poly Cotton, 200gsm fabric
- YKK concealed metal zip on jackets and pants
- Triple topstitched shoulders, armholes, in-leg & back rise
- Left breast pocket with pen division & V-flap
- Side entry pants pockets & rear right pocket
- A coated acid resistant fabric that doesn't allow wetting by acids or moisture
- Protection in the event of accidental chemical spillage
- Sold as a set

Sizes: 30 - 60

Suitable Use:

- Chemical industry
- Cleaning industry
- Brewing industry

POLY VISCOSE ACID JACKET & PANTS RT

CODE: DW-PVACID-RT

SANS 434 & ISO 6530

Protection from the following chemicals:
HCl, H₂SO₄, N₉OH, Caustic Soda

- 80/20 Poly Viscose, 270gsm fabric
- YKK Concealed brass zip on jackets & pants
- Full triple needle topstitched garment
- Mitred left breast pocket & jacket pockets
- Side entry pants pockets & rear right pocket
- 50mm Lime/silver/lime reflective webbing tape on arms, chest, legs & an "X" on the back
- A coated acid resistant fabric that prevents wetting by acids or moisture
- Protection in the event of accidental chemical spillage
- Jackets & pants sold separately

Sizes:

- Jackets: 32 - 64
- Pants: 28 - 60

Suitable Use:

- Chemical industry
- Cleaning industry
- Brewing industry
- Mining industry

J54 100% COTTON JACKET & PANTS

CODE: DW-J54XX-J / P

- 100% Cotton, 220gsm fabric
- Concealed DRO aluminium zip on jackets & pants
- Triple needle topstitched garment
- Double needle topstitched yokes
- Mitred left breast pocket with V-flap & two open mitred waist pockets
- Swing pockets on pants & rear right pocket
- The natural fibres make this garment comfortable & breathable
- Jackets & pants sold separately

Sizes:

- Jackets: 32 - 64
- Pants: 26 - 60

Suitable Use:

- Agriculture
- Construction
- Logistics
- General work environments

DENIM JACKET & PANTS SANS 434 FIT

CODE: DW-DENIM-J / P

- 100% Cotton indigo blue denim, 12oz fabric
- YKK Concealed brass zip on jackets & pants
- Full triple needle topstitched jacket & pants
- Rounded left breast pocket and two front jacket pockets with mitred flaps
- Bar-tacks on all stress points
- Rounded back pocket & side entry pants pockets
- Tool pocket on the back right leg
- The natural fibres make this garment comfortable & breathable
- Jackets & pants sold separately

Sizes:

- Jackets: 30 - 64
- Pants: 26 - 60

Suitable Use:

- Construction
- Engineering
- Steel foundry
- Automotive

J54 RT MINING SPEC BOILERSUIT

CODE: DW-J54-ANGXX / UB

Compliant to SANS 434 & SANS 1387-4

- 100% Cotton, 220gsm fabric
- 6 Pocket artisan boilersuit
- 50mm Lime/silver/lime reflective tape with double needle topstitching around arms, legs, strips above breast pocket & "X" on the back
- Concealed NG5 metal button closure
- Full triple needle topstitched garment
- 2 x Mitred breast pockets with monza NG5 metal button flaps
- Concealed elasticated waistband
- Side swing pockets & slits
- Mitred back pocket
- Side tool pocket on right leg
- The natural fibres make this garment comfortable & breathable

Sizes:

- Royal blue: 30 - 64
- Other colours: 30 - 66

ESKOM SPEC D59 FLAME JACKET & PANTS

CODE: DW-D59ESKOM

SANS 434, SANS 1387-4, SANS 1423-1

Compliant according to the Eskom PPE Specification 240-44175132.

Manufactured in RSA with DA GAMA locally produced fabric

- 100% Cotton, 315gsm flame treated fabric
- Eskom pantone navy blue jacket & pants with "Eskom" and "Zero Harm" embroidery
- 50mm Silver retro-reflective flame retardant tape double needle topstitched on arms & legs
- Concealed heavy duty Vizlon zip & plastic press stud closure
- Mitred laid on jacket pockets, mitred left breast pocket with flap & button closure.
- Two side entry pants pockets with money pocket & mitred back pockets.
- Full triple needle topstitched garment
- The natural fibres add comfort & breathability
- Protection in the event of accidental flame contact
- Jackets & pants sold separately

Sizes:

- Jackets: 28 - 64
- Pants: 24 - 60

Suitable Use:

- Eskom Distribution, Transmission, Generation & Rotek operations in compliance with Eskom group specification

D59 FLAME ACID THERMAL JACKET

CODE: DW-D59FA-WJ

SANS 1387-4, SANS 1423-1

ISO 6530 (HNO₃, HCl, H₂SO₄ & NaOH)

- 100% Cotton
- 320gsm Flame & acid retardant fabric outer
- 100gsm Flame retardant wadding interlining
- 220gsm Flame retardant lining
- YKK chunky nylon zip
- Double needle topstitched on shoulders & armholes
- Flame retardant 50mm silver reflective tape on arms
- Adjustable size flap on cuff
- Two square breast pockets with press studded flaps
- Two outer square bottom pockets with press studded flaps
- Nickel press studs throughout

Sizes:

- Navy blue: XS - 7XL
- Orange: XS - 3XL

Suitable Use:

- Petrochemical
- Oil & gas
- Mining industry
- Utilities & power generators
- Maintenance & repairs including installations

WELDING JACKET

CODE: DB-WELDJ

- Flame retardant 100% Cotton jacket with premium leather sleeves
- Flame resistant Kevlar thread for durable seams
- Adjustable, stand-up, collar for neck protection
- Flame retardant reflective "X" tape on back
- Adjustable waist for enhanced torso fit
- Protects the torso & arms from welding spatter & burns
- Comfortable, breathable & lightweight

Sizes: S - 2XL

Suitable Use:

- Welding applications with exposure to intense sparks

Protera™

12.4_{CAL} PROTERA ARC JACKET & PANTS

CODE: DW-PROT12.4-J / P

NFPA 70E Cat 2 ATPV RATING
ASTM F1959 ATPV 12.4, NFPA 2112

- ATPV 12.4 cal/cm²
- DuPont™ Protera®, 270gsm Fabric
- Engineered flame retardant yarn
- YKK Concealed brass zips on jackets & pants
- Adjustable Velcro closure
- Triple needle topstitched shoulder, armhole, inleg & back rise seams
- Flame retardant Velcro closure side slits on hem of trouser
- Nomex knitted rib cuffing
- Protera sidewinder
- Side entry pockets on jackets & pants
- 12.4 cal/cm² Rating embroidery on jacket & pants
- Jackets & pants sold separately

Sizes:

- Jackets: 32 - 60
- Pants: 28 - 56

Suitable Use:

- Electrical arc flash

D59 FLAME & ACID WELDERS HOOD

CODE: DW-D59FAWH-NB

SANS 434, SANS 1387-4, SANS 1423-1,
ISO 6530 (HNO₃, HCl, H₂SO₄ & NaOH)

- 100% Cotton, 320gsm fabric
- A flame retardant & coated acid resistant fabric
- The natural fibres add comfort & breathability
- Protection in the event of a flash fire and accidental chemical spillage

Sizes: Standard one size (S"M)

D59 FLAME & ACID WELDERS SKULL CAP

CODE: DW-D59FASCN

SANS 434, SANS 1387-4, SANS 1423-1,
ISO 6530 (HNO₃, HCl, H₂SO₄ & NaOH)

Suitable Use:

- Engineering
- Smelting operations
- Mining industry
- Construction
- Oil & gas
- Petroleum
- Maintenance & repairs
- Welding industries

HEAD & FACE PROTECTION

CODE: DH-HH
Available colours:

CODE: DH-HHCL
Available colours:

HARD HATS

- Polypropylene copolymer hard hat
- Retractable ventilation holes
- Ratchet type adjustment for easy fitment
- 2-Point adjustable webbed polyester chin strap
- Side slots for fitment of face & hearing PPE
- 8-Point suspension within the shell provides optimum shock absorption
- Anti-static & tested for electrical isolation at 2000 volts
- Complies with the requirements of SANS 1397:2003, Industrial Safety Helmets
- Certified to EN 397:2012+A1:2012, Industrial Safety Helmets
- MASC 20-8361 approved, Mining and Surface Certified as per 2015/021934/07
- CE Approved

- Available with an optional lamp mounting bracket with cord holder (DH-HHCL-W) (*Cap lamp not included*)

Suitable For Use In:

- Warehousing
- General & road construction
- Surface mining
- Utilities - General working at height
- Petrochemical & refineries
- Forestry

 **PROUDLY PRODUCED
IN SOUTH AFRICA**

BUMP CAPS

CODE: BUMPCAP

- 80% Cotton 20% Polyester Bump Cap
- Ventilated, baseball cap style
- Conforms to EN 812

NB

BK

HH CARRIER VISOR

CODE: DH-HHCARRIER

CE
EN 166

- Polycarbonate visor & ABS brow guard
- Universal face shield compatible with most industrial safety hard hats/helmets
- Provides face protection against liquid splash, medium impact particulates, molten metal & resistance to hot solids
- Suitable in construction, general industry, mining, oil & gas, utilities, airports, machining, grinding, woodwork & drilling applications

MARTCARE

CODE: DH-MARTCARE

CE

- Polycarbonate visor & brow guard carrier
- Elasticated adjustable headband
- Adjustable tilt & engage mechanism
- Provides protection against flying objects, particles, chemical splashes, splashes of molten metals & penetration of hot solids.
- Compatible for use with half mask respiratory protective devices
- Approved to EN 166

RESPIRATORY PROTECTION

Dromex

Dromex

BREATHE EASY

CHOOSING RESPIRATORY PROTECTION

Hazardous contaminants in the air can have harmful effects on the lungs and long-term health. Identifying occupational hazards and having a respiratory protection plan in place for you and your team is a highly important and pivotal step in the prevention of occupational diseases. Respiratory hazards are classified into three main categories:

Oxygen Deficiency

If oxygen levels are below 19.5%, the air is considered oxygen-deficient. Oxygen required to support life can also be displaced by gases, such as carbon dioxide, which results in an atmosphere that can be hazardous or fatal when inhaled.

Particulate Contaminants

Particles below 5 microns are more likely to reach the deep lung or alveolar spaces, therefore making particles of a 1 micron diameter of great importance. Airborne particulate contaminants can be categorized as follows:

- Fumes:** Extremely small particles, generally less than 1 micron in diameter. Fumes can result from operations such as cutting, welding, casting molten metals or smelting.
- Dusts:** Produced by operations such as sanding, grinding, crushing, drilling, machining, or sandblasting. Dust particles are often found in the harmful size range of 0.5 to 10 microns.
- Mists:** Produced by atomized and/or condensed liquids and can be created operations such as spraying, plating, or boiling, and by mixing or cleaning jobs. Particles can range from 5 to 100 microns.

Gas and Vapour Contaminants

Gas and Vapour contaminants are classified by their chemical characteristics and are similar to air as they diffuse freely within an area. Gas contaminants are categorized as follows:

- Inert Gases:** These are true gases that pose a hazard as they can produce oxygen deficiency, i.e. helium, argon, neon, etc.
 - Acidic Gases:** Often highly toxic and exist as acids or produce acids by reaction with water. E.g. Sulfur dioxide, hydrogen sulfide and hydrogen chloride.
 - Alkaline Gases:** Exist as alkalis or produce alkalis by reaction with water. E.g. Ammonia and phosphine
- Vapours are the gaseous state of substances that are liquids or solids at room temperature. They are formed when the solid or liquid evaporates. Vaporous contaminants can be classified as follows:
- Organic Compounds:** True gases or vapors produced from organic liquids. E.g. Gasoline, solvents, and paint thinners.
 - Organometallic Compounds:** Generally comprised of metals attached to organic groups. E.g. Tetraethyllead and organic phosphates.

KNOW AIR-PURIFYING RESPIRATORS

Air-purifying respirators use filters, cartridges or canisters to provide protection by preventing harmful gases, vapours, aerosols (droplet and solid particles), or a combination of contaminants from entering the respiratory system. These respirators do not supply oxygen and therefore can't be used in an oxygen-deficient atmosphere where the oxygen levels are below 19.5% or where the environment is immediately dangerous to life or health. The appropriate respirator for particular hazards will depend on the environmental contaminants. The Dromex respiratory range offers a highly protective variety of air-purifying respirator options:

DISPOSABLE MASKS

- Suitable for 8 hours of use.
- Covers the nose and mouth
- Filters particulates such as dust, mist and fumes.
- Available options:
FFP2 Unvalved & Valved
FFP3 Valved
FFP2 Valved Active Carbon
FFP3 Valved Active Carbon
FFP3 Valved Flat Fold
N95 Unvalved & Valved

HALF MASK & FILTERS

- Reusable and adjustable.
- Covers the nose and mouth.
- Compatible with interchangeable cartridges and filters that protect from harmful gases, vapours and/or particulates.
- Available options:
DH302 Twin Half Mask and A1, A1P2, A2, A2P3, ABEK1, ABEK1 P3, P2, P2PF, P3PF & P3OV filters.

FULL FACE MASK & FILTERS

- Reusable and adjustable.
- Combined respiratory and eye protection.
- Polycarbonate anti-fog and impact resistant visor with peripheral optical vision of 220 degrees
- Compatible with interchangeable cartridges and filters that protect from harmful gases, vapours and/or particulates.

MEET THE ALL NEW DH-302 HALF MASK

3-STEP WEARING

Step 1:
Fit cradle over crown of the head
while holding the mask in position
over your face.

Step 2:
Evenly pull the elastic straps at the
adjustment points behind your neck.

Step 3:
Evenly pull the elastic straps at the
adjustment points on the sides
of your head.

NB

Always remember to conduct your Positive and Negative Pressure Tests to ensure a proper face seal and to check for leak tightness.

NEW

CODE: DH-302

DH-302 HALF MASK

CE2797 EN140:1998 

- User-friendly, ergonomic and lightweight reusable adjustable twin cartridge half mask respirator
- Comfortable & soft TPR (Thermo Plastic Rubber Elastomer) face piece with durable ABS yoke
- Stitched dual elastic head bands with quick-release toggles
- Low profile design for effective use with hardhats, face shields and protective eyewear
- Pressure-correct skull cradle
- Hypoallergenic face piece
- Press-release detachment system for easy unit maintenance
- Dromex DR Cartridges feature an easy thread design for easy and secure attachment to the mask
- Designed for respiratory protection with low breathing resistance by preventing the inhalation of dangerous gases, vapours and particulates when working in a variety of industries

Suitable Use:

- General use
- Warehouses
- Freight industry
- Mining
- Engineering
- Construction

NEW

Dromex® DR-A1 and DR-A2 Twin Filters are lightweight & reusable gas cartridges, suitable for filtering certain organic gases and vapours with a boiling point greater than 65°C present in the atmosphere.

These filter cartridges are compatible with our available DR-P2PF and DR-P3PF pre-filters, which provide additional protection against particulates and prolong the life of the adjoining filter.

The twist filter mechanism on all Dromex DR-302 cartridges and filters makes them easily and quickly interchangeable with our DH-302 half mask.

Fact: When unravelled, the large pleated surface of Dromex filters gives enhanced breathing resistance and more supreme protection than what meets the eye.

Dromex® DR-ABEK1 Twin Filters are lightweight & reusable combination cartridges for protection from a variety of environmental hazards:

- Certain organic gases and vapours with a boiling point greater than 65°C and good warning properties.
- Inorganic gases and vapours, e.g. Chlorine (not Carbon Monoxide).
- Acid gases and vapours, such as Sulphur Dioxide and Hydrogen Chloride.
- Ammonia and organic ammonia derivatives.

These filters are also perfectly compatible with our available pre-filters, which provide additional protection and prolong the life of the adjoining filter.

Dromex® DR-P3OV Twin Filters are low profile pancake design flexible particle filter with odour relief from nuisance levels of organic vapor, acid gases and ozone.

Suitable for protection against dusts, mists, fumes and for welding and spray-painting applications.

DH-302 FILTERS & CARTRIDGES

CE2797
EN143:2001

NEW

P2 FILTERS

Dromex® DR-P2 Filters are a reusable, lightweight particulate cartridge, is used in conjunction with the Dromex® twin cartridge respirators.

They are suitable filters for medium concentrations of solid dust and liquid aerosol hazards, which can't be filtered by chemical only cartridges.

P2PF FILTERS

Dromex® DR-P2PF & P3PF Pre-Filters are lightweight, reusable cartridges that are easily used in conjunction with the Dromex® DH-302 gas cartridge range.

These cartridges aid in filtering out solids, dust, liquid and aerosol hazards, which cannot be filtered by chemical cartridges. Pre-filters also prolong the use of the corresponding gas filter by adding additional protection against oil when working in greasy environments.

They lengthen the lifespan of the corresponding gas cartridge and are designed for use with DR-A1, DR-A2 and DR-ABEK1 cartridges.

P3PF FILTERS

1020 - FFP2 (NRCS AZ2004/18)

Complies with BS EN 149:2001 + A1:2009 FFP2 NR D
Dolomite tested as per BSI, CE 725172.

1021 - FFP2 VALVED (NRCS AZ2004/17)

Complies with BS EN 149:2001 + A1:2009 FFP2 NR D
Dolomite tested as per BSI, CE 725172

1231 - FFP3 VALVED (NRCS AZ2004/15)

Complies with BS EN 149:2001 + A1:2009 FFP3 NR D
Dolomite tested as per BSI, CE 725172

1121C VALVED - FFP2

(NRCS AZ2004/24)
Complies with BS EN 149:2001
+ A1:2009 FFP2 OR NR D
Dolomite tested as per BSI, CE 690046

1131 VALVED - FFP3

(NRCS AZ2004/14)
Complies with BS EN 149:2001
+ A1:2009 FFP2 OR NR D
Dolomite tested as per BSI, CE 690046

**DRO-AIR
1000 SERIES**

- Low breathing resistance for increased wearer comfort
- Heavy duty, tab mounted head straps (1231 only)
- Aluminium nose bridge adjuster
- Soft foam nosepiece for comfort & custom fit
- Contour face seal for performance & comfort
- Constructed from polypropylene and polyester synthetic material preventing allergies
- Exhalation valve reduces hot air build-up & provides easy breathing in hot & humid environments

**ACTIVE CARBON
RESPIRATORS**

- Active Carbon Pre-Filter for organic vapours & welding fumes
- Low breathing resistance for increased wearer comfort
- Heavy duty, tab mounted, head straps
- An external aluminium adjustable nose clip
- Constructed from polypropylene and polyester synthetic material preventing allergies
- Soft foam nosepiece for comfort & custom fit
- Contour face seal for performance & comfort
- Exhalation valve reduces hot air build-up & provides easy breathing in hot & humid environments

N95 DISPOSABLE RESPIRATORS

- Suitable for a single 8-hour use against solid & water based liquid aerosols, that do not contain oil
- Protection against inhalation of dangerous particulates in high dust areas
- Meets CDC guidelines for M. Tuberculosis exposure control
- Can be used as part of a disease control strategy
- An ergonomic design that provides a comfortable and secure fit for different facial sizes
- A welded elastic strap along with the half face seal foam reinforces the seal with the lowest leakage.
- Lightweight with low breathing resistance for increased wearer comfort
- N95-5151 & N95-6151 includes an exhalation valve, which reduces hot air build-up & provides easy breathing in hot & humid environments
- Conforms to 42 CFR part 84, N95 class, NIOSH approved, TC-84A-448 (6151), TC-84A-7220 (5151) TC84A-7719 (5150)

Suitable Use:

- Agriculture
- Construction
- General material handling
- Medical industry applications

CODE: N95-6151

CODE: N95-5151 (VALVED)

CODE: N95-5150 (UNVALVED)

3000 SERIES

3231- FFP3 VALVED (NRCS/8072/0169)

Complies with BS EN 149:2001 + A1:2009 FFP3 NR D

Dolomite tested as per BSI, CE 690046

- Suitable for a single 8-hour use against solid & liquid based aerosols in high dust areas
- Low breathing resistance for increased wearer comfort
- Adjustable head straps
- Plastic adjustable nose clip
- Contour face seal for performance & comfort
- Soft foam nosepiece for a custom fit
- Exhalation valve reduces hot air build-up & provides easy breathing in hot & humid environments
- Dolomite tested for resistance to clogging

Suitable Use:

- Mining
- Asbestos
- Agriculture
- Construction
- General material handling industries

ACCESSORIES

These bags are designed to protect your reusable respiratory Midi-Mask or Full Face Mask & filters while not in use.

They also include a waist strap with quick release buckle so your equipment can be kept on you during the course of your work.

FULL FACE MASK BAG
CODE: DH-FFMBAG

MIDI MASK BAG
CODE: DHRB-BLK

DISPOSABLE CUP SHAPE RESPIRATORS

QSA 2010 - FFP1
(NRCS AZ2006/21)

QSA 2020 - FFP2
(NRCS AZ2006/20)

QSA 2021 - FFP2 (VALVED)
(NRCS AZ2006/29)

QSA DUST MASKS

- Suitable for a single 8-hour use against solid & water based liquid aerosols
- Protection against inhalation of dangerous particulates
- Constructed from polypropylene and polyester synthetic material preventing allergies
- Aluminium nose bridge adjuster
- Lightweight and comfortable
- Exhalation valve reduces hot air build-up & provides easy breathing in hot & humid environments (QSA 2021 only)

- NRCS Homologated

Suitable Use:

- Household maintenance
- Mining
- Asbestos removal
- Agriculture
- Construction
- General material handling

SINGLE HALF MASK

CODE: DH-101

- Soft PVC mask with deep face mould for a comfortable fit with an excellent seal
- Dual wide elastic headband connected with a pin swivel connector, adjustable & with a quick release toggle
- Efficient exhalation valve
- For use with the DHCS single unifit filter cartridge system

PVC TWIN HALF MASK

CODE: DH-102

- Soft PVC mask with deep face mould for a comfortable fit with an excellent seal
- Dual wide elastic headband connected with a pin swivel connector, adjustable & with a quick release toggle
- Efficient exhalation mask
- For use with the DHCT twin unifit filter cartridge system

TPR TWIN HALF MASK

CODE: DH-202

- Soft TPR (Thermo Plastic Rubber) with a deep face mould for a comfortable fit with an excellent seal
- Dual wide elastic headband with a skull cradle and a pin swivel connector, adjustable & with a quick release toggle
- Efficient exhalation valve
- For use with the DHCT twin unifit filter cartridge system

FULL FACE MASK

CODE: DH-FFM

- Premium protection against hazardous vapours, gases & particulates
- Thermo Plastic Rubber full face seal
- Anti-fog visor with 220° vision
- 5-Point comfort harness with 2 grip holes ensures easier fitting
- Lightweight dual filter cartridge system evenly distributes weight of the mask during use
- Compatible with Dromex unifit twin filters
- Designed to withstand temperatures up to 70 °C
- One size fits all
- For use with the DHCT twin unifit filter cartridge system

These gas, vapour & dust filters are designed to fit the DroAir range of Midi & Full Masks. The full gas & particulate filter range is colour coded to European standards as per EN 141, EN 143 & EN 14387.

All Unifit filters are individually sealed and supplied with a replacement inhalation valve.

Single Filter Fitment
WARNING! Single filters should only be used with single masks.

Twin Filter Fitment
WARNING! Twin filters should only be used with twin masks.

SINGLE FILTERS

DHCS A1 - Organic

DHCS P2 - Particle

DHCS / DHCT P2PF Pre-filter

**Available for single & twin cartridge respirators*

Suitably used with Dromex® gas cartridges that fit onto the Dromex cartridge respirators filtering out solids, dust and liquid aerosol hazards, which cannot be filtered by chemical cartridges.

Pre-filters prolongs the life of the corresponding gas filter.

TWIN FILTERS

DHCT A1 - Organic

DHCT A2 - Organic

DHCT B1 - Inorganic

DHCT-ABEK 1

- Organic, Inorganic,
 Acid & Ammonia

DHCT P2 - Particle

DHCT P3 - Particle

DHCT P3PF - Pre-filter

Dromex

HEARING PROTECTION

LISTEN UP

KNOW HEARING PROTECTION

Dromex

STEPS TO SELECTION & USE

The selection of hearing protection has a basic four-step method:

-  **Identify:** Measure and record the potential noise hazard.
-  **Assess:** The hazards and associated health risks should be assessed as well as other required protective equipment to ensure compatibility.
-  **Select:** The proper hearing protection suitable for the hazard should be selected. This is made easy using the EN 352 noise reduction ratings.
-  **Training:** Training is a very important step to optimise hearing protection by ensuring the operator is proficient in the use and limitations of his/her hearing protector.

HEARING LOSS

Hearing loss caused by exposure to noise at work continues to be a significant occupational illness despite the improvements made for comfort and attenuation. Hearing protection can play a vital part in avoiding occupational hearing loss. Although conformity to local legislation should always be a priority, cost effective solutions that are comfortable and easy to use also play a role.

Hearing loss can be gradual because of exposure to noise over time, but damage can also be caused by sudden & extremely loud noises. The damage is disabling as it can stop people being able to understand speech, keep up with conversations or it may develop into Tinnitus (ringing, whistling, buzzing or humming in the ears), a distressing condition which can lead to disturbed sleep.

EXPOSURE & PROTECTION

As a rule of thumb, if you must shout to be understood over the background noise when standing about 1 meter away from somebody, that background noise is hazardous.

Using EN352 hearing protectors, following safety requirements and testing the occupational risks assists with prevention of occupational noise-induced hearing loss.

- Protection is required if the environmental noise is over 85dB
- Noise below 75dB is considered to be non-hazardous

HEARING PROTECTION SELECTION GUIDE:

Dromex ear plugs & ear muffs are suitable for use in the following applications:

Machining & grinding, woodwork, steel cutting, aviation, high pressure steaming, shooting range, hunting, tree felling & forestry.

TYPICAL NOISE MEASUREMENTS

HARMFUL RANGE	180	Rocket launching	
	170	Rifle shot (1m) Shotgun	
	160	Immediate physical damage	
	150	Balloon popping Aircraft engine (30m)

EAR PLUG DISPENSER

CODE: DRO30-DISP

- Disposable ear plug dispenser that can be placed on a surface or wall-mounted
- Makes hearing protection easily accessible to staff & visitors
- Holds 500 pairs of DRO30 disposable foam ear plugs
- Refill packets sold separately (Code: DR030)

COMPOSITION:

- CE EN 352-2 (H=36 dB, M=35 dB, L=34 dB)
- SNR 37 dB

DISPOSABLE FOAM EAR PLUGS CORDED & UNCORDED

CODE: DR-098C

CODE: DR-098

CODE: DR-099C

- Disposable, hi-visibility fluorescent PU foam ear plugs
- PU coated for hygiene
- Smooth, soft, pliable & easy to use
- Superb attenuation
- Expands to fit ear canal comfortably increasing overall protection

DR-098C & DR-098 (Corded & un-corded)

- CE EN 352-2 (H=36 dB, M=34 dB, L=33 dB)
- SNR 37 dB

DR-099C (Corded)

- CE EN 352-2 (H=33 dB, M=33 dB, L=32 dB)
- SNR 35 dB

RE-USABLE EAR PLUGS

CODE: EG3301B

CODE: DR-090CDET

CODE: DR-118C

CODE: DR-090C

CODE: DR-090CI

- Hi-visibility blue triple flange TPR ear plugs
- H=28 dB, M=25 dB, L=25 dB)
- SNR 28 dB

- Hi-visibility fluorescent blue triple flange TPR ear plugs with detectable bearing
- H=33 dB, M=30 dB, L=28 dB
- SNR 32 dB

- Hi-visibility fluorescent blue triple flange TPR ear plugs
- H=31 dB, M=28 dB, L=27 dB
- SNR 31 dB

- DR-090C & DR-090CI** (Corded & Plastic Box)
- Hi-visibility fluorescent green triple flange TPR ear plugs
 - (H=33 dB, M=30 dB, L=28 dB)
 - SNR 32 dB

CLASSIC EAR MUFF

CODE: CEM

- Padded headband ear muff with soft foam cushions
- Low risk of entanglement on machinery
- Hearing protection for extended periods
- Durable self adjusting ABS cups
- Close fitting wire headband
- H=33,9 dB, M=26,4 dB, L=17,7 dB
- SNR 28,6 dB

JM EAR MUFF

CODE: JM-B

- Banded ear muff with soft foam cushions
- Adjustable rotational ABS cups
- Lightweight & robust design
- Suitable for light industrial duty & outdoor construction
- H=28 dB, M=23 dB, L=15 dB
- SNR 25 dB

BUSHMASTER

CODE: BUSH-WG / BUSH-PC

- Twin point mounted, adjustable ABS cups and soft foam cushions
- Hearing protection for extended periods
- Visor can easily flip up and down
- Close fitting wire headband for comfort
- H=36 dB, M=27 dB, L=18 dB
- SNR 30 dB
- Replacement visors sold separately:
Gause: BUSH-BWGVISOR
Polycarbonate: BUSH-BPCVISOR

INTEREX

CODE: INTEREX

- EU slotted
- Unique DROMEX connector that fits all hard hats
- Large twin point mounted cups with soft foam cushions
- Easy to attach & detach with spring loaded arms
- Steel arms maintain a constant & even pressure
- Adjustable cup for optimum comfort & fit
- H=31 dB, M=26 dB, L=19 dB
- SNR 28 dB

SAFETY EYEWEAR

Dromex

ORDER OF MARKING ON OCULARS WHERE RELEVANT:

							
Scale number (filters only)	Makers mark	Optical class	Mechanical strength	Fields of use	Scratch resistance	Fog resistance	Radiant heat

ORDER OF MARKING ON FRAMES WHERE RELEVANT:

			
Makers mark	The Standard	Fields of use	Mechanical strength

LENS SELECTION AND APPLICATION:

Clear		general indoor use eye protection against impact hazards	
Grey		sunglare 5-2,5	Outdoor anti-glare lens use to prevent eye fatigue from sun glare
Amber		uv 2-1,2	Prevention of high density light (hdl) for contrast and rotational clarity
Green		sunglare 5-2,0	Prevent eye fatigue from indirect light flash
IR green		infrared 4-IR3 or 5	Used for certain welding & gas cutting techniques
Mirror		sunglare 5-1,7	Indoor/outdoor (i/o) for artificial and sunlight glare
Blue		sunglare 5-2,5	Outdoor anti-glare lens use to prevent eye fatigue from sun glare

FIELD OF VISION (OPTICAL CLASS)

- 1 - ± 0,06 DIOPTRES
- 2 - ± 0,12 DIOPTRES
- 3 - ± 0,25 DIOPTRES

Optical class 1, 2 or 3 - indicates optical quality of the ocular and the wear duration

OCULAR (1 - 3)

- PERMANENT WEAR
- OCCASIONAL WEAR
- EXCEPTIONAL WEAR

ROBUSTNESS

FRAME AND OCULAR are required to withstand specified lateral and frontal impacts at specified speeds

AGEING

FRAME AND OCULAR stability at elevated temperatures and ultraviolet radiation (oculars only)

HIGH SPEED PARTICLES

- F – LOW ENERGY
- B – MEDIUM ENERGY
- A – HIGH ENERGY
- S – INCREASED ROBUSTNESS

OCULAR (6mm STEEL BALL (0 86g))

- 45 m/s
- 120 m/s
- 190 m/s
- (See optional below)

X	X	X
	X	
		X
X	X	X

OTHER FIELDS OF USE:

				
	3 – LIQUIDS Liquid droplets for goggles Liquid splash for face shields but not mesh		X	X
	4 – LARGE (COARSE) DUST PARTICLES for goggles		X	
	5 – GAS & FINE DUST PARTICLES		X	
	8 – SHORT CIRCUIT ELECTRIC ARC Face-shield to comply with a filter of scale number 2-1,2 or 3-1,2 and have a minimum thickness of 1,4 mm			X
	9 – MOLTEN METAL & HOT SOLIDS Both the frame and ocular shall be marked with this symbol together with one of the symbols F, B or A		X	X
	K – GAS & FINE PARTICLE DAMAGE			X
	N – RESISTANCE TO FOGGING (8 seconds)	X	X	X
	G – RADIANT HEAT (EN 1731)		X	
	S – INCREASED ROBUSTNESS (22mm ball at 5, 1 m/s)	X	X	X
	T – EXTREME TEMPERATURE (-5 to 55°C) Used in conjunction with either F, B or A to indicate that the eye protector conforms to the high-speed particle classification at extremes of temperature	X	X	X
	ANTI-SCRATCH Optional anti-scratch coating to protect the eye protector

- CODE: DV-326B-G-AF

- **Used as a spectacle or a goggle all in one!**
- Prescription lens inner attachment
- Polycarbonate mono lens & soft rubber face seal
- Efficient indirect ventilation system
- Detachable black polycarbonate adjustable temple
- Detachable 12mm adjustable elasticated headband
- Anti-fog & scratch resistant lens
- **Suitable Use:** General industry, light chemical splashes

MAXI VIEW GOGGLES

CODE: DV-004MAX

- Clear (EN 170 2-1,2) polycarbonate mono lens
- 25mm Elasticated & adjustable headband
- High quality PVC frame
- Wide face contact area for comfort & seal
- Efficient indirect ventilation system
- Suitable with prescription spectacles
- Anti-fog lens & scratch resistant lens
- **Suitable Use:** Grinding, woodwork, light chemical splashes

WELDING GOGGLE

CODE: DV-GW5

- Shade 5, flip-up, polycarbonate mono lens
- Soft rubber face seal
- Efficient indirect ventilation system
- 11mm Adjustable elasticated headband
- Scratch resistant lens & anti-mist lens
- **Suitable Use:** Welding industry & applications

WRAP AROUNDS

Available lens colours:

-  **CODE: DV-1C**
-  **CODE: DV-1A**
-  **CODE: DV-1GN**

- Polycarbonate mono lens & temples with ventilation
- Can be used with prescription spectacles as an over spectacle
- *Amber & Green:* Anti-glare lens
- Scratch resistant lens
- **Suitable Use:** Overspecs & visitors glasses

WIRE MESH

EN 1731

CODE: DV-504

- Metal wire mesh dual lens
- Clear polycarbonate & removable side protectors & vinyl adjustable temples
- **Suitable Use:** Forestry, woodwork, carpentry, mining

TECHNOLOGY

UNDERSTANDING THE NEW GLOVE STANDARD

You may have heard about the new glove standard but not quite sure what it means or how it's going to affect you.

Let's unpack what's changed by comparing the old to the new, explain the new testing methods and show you what to expect from the new glove markings.

OLD vs NEW

The new EN 388:2016 standard released in November 2016 has replaced the old EN 388:2003 glove standard in Europe.

Testing on resistance to abrasion, tear and puncture are carried out as they were before with minor clarifications to testing procedures and materials. The test results correspond the same way they did in the 2003 version with ratings of 0-4, with 4 being the highest performance level.

The main difference in the 2016 edition is in relation to cut resistance and impact protection. The new version now includes a TDM blade test in addition to the existing Coup Method and a test for impact resistance.

Existing Cut Test - Coup Method:

Under the EN 388 glove standard, introduced in 2003, cut resistance is measured with a Coup Test machine. A section of fabric is placed in a holder and a rotating circular blade is moved back and forth at a constant speed, pressing down with a force of 5 Newtons. When the blade cuts through, a performance rating from 1 to 5 is calculated from the total distance of travel. The blade gradually loses sharpness, so at the start and finish it is calibrated using cotton fabric. Therefore, the result can be less accurate for gloves with a higher cut-resistance. This test method remains in the 2016 version but is only to be used for materials that do not affect the sharpness of the blade.

Additional New Cut Test - TDM blade test:

TDM is an abbreviation for the equipment used to conduct this test, a tomodynamometer. This test involves a straight blade being drawn across the sample in one movement, with a new blade every time. The 'stroke length' before cut-through is recorded for a range of forces and graphs plotted to predict the force required to cut through the glove in 20mm of travel. This force is used to calculate a score from A to F, with F being the highest rating.

Impact Testing

Impact verification has been added to EN 388: 2016. The test method is taken from the motor cycle standard EN 13594:2015.

The area where the impact protection is claimed to be tested, but due to technical reasons, the area around the fingers cannot be tested.

If the requirements are fulfilled, the glove will be marked with a P (Pass). If the glove fails, there will be no marking.

HOW DOES THIS AFFECT YOUR CURRENT GLOVES?

EN 388:2016 supersedes EN 388:2003 BUT it only affects new product certification and will not apply retrospectively.

Gloves may continue to be sold under both versions of the standard until 2023 when, under the new PPE regulation, certification will need to be renewed to the latest version of the standard.

INFERNO

CODE: INFERNO

- Tan leather multi-layered fire fighters glove
- High breathability
- High heat resistance
- High temperature stability
- High abrasion resistance
- PU moisture barrier
- Multi-layer protection provides flexibility, comfort & excellent insulation

Sizes: M - XL

Meets with the requirements of NFPA 1971:2013 Edition: Standard on Protective Ensembles for Structural Fire Fighting.

- Gunn cut wing thumb with reinforced index & middle finger palm
- Knitted cuff with continuous pull & shirred back
- Multi-layer: hand layer is knitted composite modacrylic para-aramid fibre with a non-woven urethane vapor barrier. Finger tacked.
- Tan split cow leather palm 1.0 to 1.2mm with equivalent reinforcing
- Tan split cow leather back 1.0 to 1.2mm, shirred
- Yellow aramid knitted wrist cuff with tan split cow leather 0.8 to 1.0mm leather continuous pull

Suitable Use:

- Structural & wildland fire fighting applications
- Search & rescue

- Double dipped & fully coated nitrile glove
- Protection against mechanical risks
- Superior dexterity
- Textured palm for grip in wet & oily conditions
- 13-Gauge comfortable seamless nylon liner
- High abrasion protection & tear resistance
- Provides liquid protection & water resistant

Sizes: 8 - 10

Suitable Use:

- Oil & gas industry (OGP)
- Mining & extraction
- Heavy machinery
- Aerospace
- Mechanical workshops
- Automotive
- Precision engineering applications

THOR ELECTRICAL INSULATING GLOVES

CODE: DG-THOR

AC (alternating current)
RC category PN-EN 60903:2006
(EN 60903:2003 + AC2:2005)

- Exclusively for electrical purposes
- R - acid resistant, oil resistant, ozone-resistant
- C - resistant to extremely low temperatures
- High quality rubber latex
- High flexibility preventing hand fatigue
- Fits well when worn with protective leather over gloves
- Each glove is electrically tested & issued with an examination certificate
- 360mm (±15mm) long

Sizes:

- Class 0 - 2: 8 - 10
- Class 3: 9 & 10

Available in four classes defining voltage requirements:

CLASS 0 > 0 (5kV), Low voltage

CLASS 1 > 1 (10kV), High voltage

CLASS 2 > 2 (20kV), High voltage

CLASS 3 > 3 (30kV), High voltage

Suitable Use:

- Electrical purposes, installation, maintenance & repairs

LEATHER OVER GLOVES

CODE: DG-OV

EN 407:2020

3132

4XXXXX

- Designed to protect the Thor electrical insulating gloves from potential hazards such as cut, abrasion, tear, puncture & flame.
- Can also be used as mechanical gloves, worn directly over the hands for non-electrical / arc applications
- Adjustable Velcro strap ensuring secure fit
- Waterproof cow grain leather with Kevlar thread
- High resistance to flammability
- Highly flexible & durable

Sizes: S / M
L / XL

Suitable Use:

- Electrical purposes, installation, maintenance & repairs
- Mechanical applications

NITRIFLEX

EN 388

4121

- High abrasion
- Strong oil-resistance
- Super grip
- Softer touch & higher flexibility
- 100% Nitrile micro foam finish
- Nylon blended spandex liner
- Innovative fibre
- Composite knitted wrist
- Sanitised

CODE: NITRIFLEX

Sizes: 7 - 11

Suitable Use:

- General maintenance (indoor & outdoor)
- Assembly work (indoor & outdoor)

CODE: NITRIFLEXPC

GNYLON

CODE: GNYLON

EN 388

- Ultra thin for comfort & tactile sensitivity
- Ambidextrous
- Eliminates fingerprints & scratches
- Reduces perspiration on palms
- Composite knitted wrist
- Dust & lint retardant
- Washable & reusable

Sizes: 8 - 10

Suitable Use:

- Automotive industry
- Glass & steel
- Chemical handling
- Oil & gas

NITROLITE

CODE: NITROLITE

EN 388

BODY PROTECTION

PROMAX DISPOSABLE COVERALL

CODE: PROMAX

- Type 5 and 6 disposable coverall
- Microporous spun bound polypropylene and polyethylene laminate fabric with bound seams
- Zip and storm flap front closing
- Non-linting
- Good mechanical properties and performance
- Protects the arms, legs, torso and head from the hazards of light liquid sprays, chemical splashes and sprays, airborne solid particulates and anti-static dissipation
- Liquid penetration resistance against a basic range of chemicals:
 - Sulphuric Acid 30% - Class 3
 - Sodium Hydroxide 10% - Class 3
 - O-Xylene - Class 3
 - 1-Butanol - Class 3

Sizes: Small – 3XL

Suitable Use:

- Pharmaceutical
- Food processing
- Asbestos removal
- Accident attendance
- Fiber exposure
- Painting and spraying
- Clean rooms
- General maintenance

PROMAX 1000 DISPOSABLE COVERALL

CODE: PROMAX-1000

EN 14126:
2003+AC:2004

- A breathable microporous polyethylene with spunbond polypropylene composition that has excellent physical properties (strength, elasticity, tear etc)
- Enhanced waterproof performance providing impervious protection suitable for use against biological hazards
- All seams are taped for additional strength and protection especially against dangerous airborne particles & liquid
- Resistant to:
 - GB 19082-2009, clause 5.4 – Water penetration
 - GB 19082-2009, clause 5.4.3 – Penetration by synthetic blood
 - GB 19082-2009, clause 5.7 – Filtration efficiency
 - GB 19082-2009, clause 5.10 – Electrostatic decay properties

Sizes: M – XL

Suitable Use:

- Industrial & medical environments

PROMAX C4000 DISPOSABLE COVERALL

CODE: PROMAX-C4000

- Type 3, 4, 5 & 6 disposable coverall
- Yellow polypropylene and polyethylene foil fabric
- Ultrasonic welded & taped seams preventing permeation, dust & liquid ingress
- Double zip & storm flap for secure front protection
- Double elasticated cuff with thumb loop
- Double layer cushioned knee pads for comfort & durability
- Protects the arms, legs, torso & head from the hazards of light liquid sprays, chemical splashes & sprays, airborne solid particulates, radioactive contamination, anti-static dissipation & infective agents contact
- Resistant to penetration by blood/fluids, wet bacterial penetration, biologically contaminated aerosols & powders
- Permeation and chemical penetration protection against a basic range of chemicals:
 - Sulphuric Acid 96% - Class 6 (Permeation)
- Class 3 (Penetration)
 - Sodium Hydroxide 10% - Class 3 (Penetration)
 - o-Xylene - Class 3 (Permeation)
 - 1-Butanol - Class 3 (Penetration)

Sizes: S - 3XL

Suitable Use:

- Chemical handling & distribution
- Chemical clean ups
- Contaminated land cleaning
- Pathogens
- Oil spills
- Tank cleaning
- Petrochemical
- Refining applications

NON WOVEN DISPOSABLE COVERALL

CODE: PDISPO

- Disposable full body coverall for protection against dust & fine particulates
- 50gsm Spunbond polypropylene
- Elasticated wrists, legs & hood
- Nylon zipper front
- Lightweight

Sizes: M - 3XL

Suitable Use:

- General maintenance

WHATEVER THE WEATHER WE HAVE YOU COVERED.

Working outdoors or in cold environments means that the elements can sometimes be against you but one thing you can be sure of is that the Dromex Storm range is always on your side.

Dromex Storm apparel has been formulated for endurance in some of the harshest environments including cold storage & refrigeration, outdoor contractor applications, outdoor security, agriculture, mining and even the petrochemical industry.

Every Storm jacket & suit has been made to ensure thermal protection, water resistance, high-visibility if required and include valued features for practicality, safety & comfort.

Our premium Hydro-Plus rain suit has been designed to offer protection from chemicals and has flame resistant & anti-static properties.

Whether the temperatures are low or there's wind, driving rain and unpredictable conditions, being assuredly safe, dry and warm is something you can count on.

We believe you're entitled to maximum protection without compromise and we make sure you always get it.

Dromex

- Inner: 300gsm Cotton with 190T Polyester Taffeta
- Thermal flannel lining
- Jacket includes a fixed hood with drawstrings, a heavy-duty zip & elasticated sleeve cuffs
- Trousers have an elasticated waist, two side pockets & press stud closures on ankles

Sizes:

Jackets: S - 3XL

Pants: S - 3XL

Suitable Use:

- Cold storage & refrigeration
- Outdoor work in cold climate
- Contractor applications

NEW

AGRIMAC OIL SKIN BIB PANTS & JACKET

CODE: DB-AGRIMAC-BP / J

- Heavy-duty premium grade PVC
- 70% PVC outer lining, 30% Polyester inner lining
- Water-resistant jacket & bib pants suit
- Jacket with fixed hood, high collar & drawstring closures
- Sleeves with internal storm cuffs
- Hip pockets with hook & loop storm flaps
- Bib pants with high quality adjustable polyester webbing suspender and Polyoxymethylene buckle
- Jacket & bib pants sold separately

Sizes:

Jackets: S - 3XL

Pants: S - 3XL

Suitable Use:

- Work in rain / wet / cold environments
- General mining
- Agriculture
- Fishing
- Outdoor & contractor applications

HYDRO RAIN SUIT

CODE: DB-HYDRO

- **Recommended Product**
- Heavy duty PVC coated rain suit with hood
- 85% PVC 15% Polyester
- Jacket with fixed hood & drawstring closing
- Storm flaps over heavy-duty plastic zip with large plastic press stud closure
- Pants with elasticated waist and press stud closures on the ankles
- All seams are electro welded and stitched for durability
- Comfortable to wear

Sizes: S - 4XL

STORM JACKET & BIP PANTS

CODES: JH-SM-G (JACKET)
BP-SM-G (BIB PANTS)

- Heavy duty PVC & Polyester inner lining, 481gsm
- Welded seams throughout for waterproof protection
- Jacket with fixed hood & drawstring, 2 pockets with storm flap, plastic double snap closure at the neck
- Sleeves with internal storm cuffs
- Bip pants have adjustable webbing suspender with plastic buckles

- Jackets & Bib pants sold separately

Sizes:

Jackets: S - 3XL

Bib Pants: S - 3XL

Suitable Use:

- General mining
- Marine & fishing industry
- Outdoor & contractor applications
- Rain & wet environments

ACE APRONS

- Full or half length aprons with buckle closure, adjustable neck & waist strap
- Heavy-duty premium cow split leather
- Protects the worker's entire front of body

Suitable Use:

- Welding
- Maintenance
- Manufacturing
- Carpentry

FALL ARREST

CODE: DFA-PN10-PS

CODE: DFA-PN10

FULL BODY HARNESSSES

- Polyester full body harness with adjustable chest & leg straps
- Includes a Dorsal D-Ring for fall arrest
- Ideally placed sit strap for extended comfort
- Equipped with Lanyard Keepers for placement of free lanyards
- Weight capacity of 140kg (incl. tools)

DFA-PN10

- Includes shock absorbing double lanyard with steel scaffold hooks (DFA-PN361N) and 25mm chest strap

DFA-PN21

- Includes shock absorbing double lanyard with steel scaffold hooks (DFA-PN361N)
- Adjustable 44mm sliding chest strap, shoulder straps, leg straps and waist belt

Sizes: One Size

- Meets the requirements of the European PPE Regulation (EU) 2016/425
- Certified to EN 361:2002 and EN 355:2002

Suitable Use:

- Construction industry
- Cleaning, painting & building maintenance
- Scaffolding applications
- Refineries
- Oil Rigs

CODE: DFA-PN21

DOUBLE SCAFF HOOK LANYARD

CODE: DFA-PN361N

- Fall Arrest 44mm Forked Webbing Lanyard made from high tenacity polyester (1.75m length)
- Consists of Energy Absorber with loop and Steel Scaffold Hooks
- Allows movement in all directions while remaining safely anchored at all times
- Loops are protected by an abrasion resistant covering at the ends and prevents the webbing from being damaged by the metallic connector.
- Certified as per EN 355:2002

RETRACTABLE FALL ARRESTERS

- Vertical length systems (DFA-PN2002)
- Vertical & horizontal length systems (DFA-TPGS15 and DFA-TPGS06)
- Colour impact indicators at attachment ends
- Certified as per EN 360:2002

REFLECTIVE WEAR: GENERAL INFORMATION

To ensure that your reflective garment is effective it needs to conform to EN ISO 20471:2013.

What is EN ISO 20471?

EN ISO 20471 is a revised version of the previous EN 471 high visibility PPE standard. According to Directive 89/686/EEC, it requires by law to protect people who work on or near a roadside, whilst they go about their day to day business.

The standards are set by identifying the risks to people. This is the minimum standard for high visibility clothing, which is capable of visually signalling the user’s presence and which specifies test methods and performance requirements for PPE worn in high-risk situations.

What is the main criteria for the standard?

Colour and retroreflection as well as for the minimum areas and for the placement of the materials in protective clothing. Three classes of garment are defined based on three different minimum areas of retroreflective, fluorescent and/or combined performance materials. Each of these classes will provide a different level of conspicuity.

Material	Class 3 Garments	Class 2 Garments	Class 1 Garments
Background material	0,80	0,50	0,14
Retroreflective material	0,20	0,13	0,10
Combined performance material	n.a.	n.a.	n.a.

NOTE: The clothing class is determined by the lowest area of visible material.

Class 3 is the class that provides the highest degree of conspicuity against most backgrounds found in urban and rural situations in daylight and in night time. There are within the standard, certain requirements for in-use test requirements.

The standard takes into consideration the materials require brightness after:

- Retroreflective
- Rainfall performance
- Temperature variation
- Abrasion
- Cold folding
- Flexing
- Washing
- Dry cleaning (where applicable)
- Flourescent
- UV exposure
- Dimensional change
- Water vapour resistance
- Colour fastness
- Mechanical properties

CODE: SA14-NS

CODE: SA13-SL

2-TONE REFLECTIVE JACKETS 100% POLYESTER TRICOT/MESH FABRIC

CODE: SA13-SL

SA14-NS (SLEEVELESS)

- Polyester & mesh fluorescent lime open weave fabric
- Reflective tape is 50mm silver bead industrial washing T/C tape
- Nylon zip fastener with metal slider & buttons
- Identity card holder on left breast (SA13-SL only)
- Garment Class 2
- Enhanced visibility from all sides
- Detachable zip sleeves (SA13-SL)

Sizes: S - 3XL & 5XL

- Manufactured to ISO 20471:2013 (EN 471 & SANS 50471) as per requirements of 89/686/EEC.

Suitable Use:

- Construction industry
- Warehouse environment
- Mining industry
- Police/law enforcement

FLAME RETARDANT REFLECTIVE VEST

CODE: SA003-FR

- Flame retardant vest made with 100% Polyester fluorescent lime open weave fabric
- Flame retardant tape is 100% Cotton woven fabric with micro-glass bead coating, 520g/m²
- Velcro closure
- Black Polyester binding
- Garment Class 2

Sizes: S - 5XL

Suitable Use:

- Construction industry
- Warehouse environment
- Mining industry

Compliance

Tape: EN ISO 20471:2013 & EN 469:2005+A1+AC
Fabric: ISO 6330:2012, EN ISO 14116:2008

FLAME RETARDANT & ANTI-STATIC REFLECTIVE VEST

CODE: SA11-ASFR

- Flame retardant & anti-static vest made with 96% Polyester fluorescent lime open weave fabric & 2% carbon thread
- Flame retardant tape is 100% Cotton woven fabric with micro-glass bead coating, 520g/m²
- Nylon zip fastener with metal slider
- Clear on black top entry plastic pouch
- Black Polyester binding
- Garment Class 2

Sizes: S - 3XL

Suitable Use:

- Construction industry
- Warehouse environment
- Mining industry

Compliance

Tape: EN ISO 20471:2013 & EN 469:2005+A1+AC
Fabric: ISO 6330:2012, EN ISO 14116:2008

2-TONE MESH REFLECTIVE VEST

CODE: SA50Y-OR / YB

- 100% Polyester fluorescent yellow/navy or yellow/red knitted weave fabric
- 18mm Reflective tape - retro-reflective silver glass beads
- Nylon zip with metal slider
- Clear PVC on black top entry plastic pouch/ID pocket

Sizes: S - 3XL

Suitable Use:

- Construction industry
- Warehouse environment
- Mining industry

2-TONE REFLECTIVE VEST

CODE: SA-2T

- Nylon black zip with metal slider
- Clear PVC on black top entry ID pouch
- White reflective tape

Sizes: S - 5XL

MESH REFLECTIVE VEST

CODE: SA7B2

****MESH VENTILATION WITH PVC TAPE**

- Nylon lime zip with metal slider.
- Clear PVC on black top entry ID pouch
- Space for branding on back of vest

Sizes: S - 5XL

SA10 REFLECTIVE VEST

CODE: SA10-LIME

- Nylon zip with metal slider.
- Clear PVC on black top entry ID pouch
- Construction/warehouse/mining

Sizes: S - 5XL

GLASS FIBRE FIRE BLANKET

CODE: FBGF

Complies with requirements of EN 1869 :1997

- 100% Glass fibre
- Heat resistant, light duty fire blanket designed to extinguish small incident fires
- Protects human lives & equipment from fire
- Withstands temperatures reaching 550°C
- Supplied in a red, clearly marked bag that can be hung on nearby walls for quick access

Sizes: 2m x 2m

Suitable Use:

- Household kitchen fires (oven & stove)
- Extinction of fire on clothing
- Catering establishments/restaurants
- Training centres
- Hospitals & nursing facilities
- Laboratories
- Garage & workshops
- Retail outlets
- Flammable liquid cans
- Cinema projection rooms
- Office buildings

CERAMIC FIRE BLANKET

CODE: FBCER

- 1200°C Ceramic fibre cloth
- Low thermal conductivity
- High temperature stability
- Excellent tensile strength

Size: 2m x 2m

Suitable Use:

- Construction industry
- Warehouse environment
- Mining industry

WELDING SCREENS

CODE: WELDSCR

- 100% Flame Retardant PVC
- Brass eyelets

Sizes:

- 2m x 2m
- 2m x 3m

Suitable Use:

- Construction industry
- Warehouse environment
- Mining industry

CODE: FA-3

CODE: FA-3/REFILL

FIRST AID KITS

FIRST AID KIT FA-3 & FA-7

- Emergency treatment for sick or injured
- White, portable & wall mountable steel box

Replacement Contents Available:

- FA-3/Refill
- FA-7/Refill

Suitable Use:

- Indoors
- Offices
- Manufacturing environment

CODE: FA-7

CODE: FA-7/REFILL

FOOT PROTECTION

Dromex

DISCLAIMER

It is recommended that the local standards and regulations for foot protection, recommendations for selection, use, care and maintenance should be used. This information is a guide for selection only. All footwear is manufactured to statutory and specific tender requirements and should not be modified in any way.

ISO 20345:2011

The standard covers all requirements for safety footwear - the understanding of the classifications, categories and other performance requirements will allow the user to select the correct shoe or boot for the intended operation and potential hazards.

CLASSIFICATION OF FOOTWEAR

I	Footwear made from leather and other materials
II	All-rubber entirely vulcanised or all-polymeric entirely moulded

MARKING CATEGORY

Category	Class	Performance
SB	I	Impact & Compression
S1	I	SB + Closed Seat + A + E
S1P	I	S1 + P
S2	I	S1 + WRU
S3	I	S2 + P + Cleated Outsole
S4	II	SB + A + E
S5	II	S4 + P + Cleated Outsole

TEST REQUIREMENTS

SYMBOL	REQUIREMENTS	PERFORMANCE
SB	Impact resistance (Steel toe cap)	>200 J (Joule)
	Compression test	>15kN
P	Puncture resistant sole	≥1,100N
C	Electrical resistant	<100 kQ
A	Anti-static	100 kQ ≤1 000 MQ
I	Electrically insulating footwear	Class 0 or 00
HI	Insulates against heat	Up to 150°C
CI	Insulates against cold	Up to -20°C
E	Energy absorption in heel	≥20J
WR	Water resistant footwear	≤3 cm ²
M	Metatarsal protection	> 200J
AN	Ankle protection	>30kN
WRU	Uppers resistant to water penetration	≥60 mins
CR	Cut resistant upper	≥2.5 (Index)
HRO	Heat resistant outsole	Up to 300°C

MARKING FOR SLIP RESISTANCE

SRA	Slip resistance on ceramic tile floor with SLS*
SRB	Slip resistance on steel floor with glycerol
SRC	Slip resistance on ceramic tile floor with SLS* and on steel floor with glycerol

*SLS = Sodium lauryl sulphate solution

ULTECO^{PLUS} BOOT

CODE: DF-SK7026

NRCS/9002/217251/0005

- Conforms to EN ISO 20345:2011, NRCS/9002/217251/0005 as per SANS 20345:2014
- Water resistant Buffalo Buff leather upper
- Steel midsole protects against penetrating surfaces and objects
- Cleated oil & slip resistant outsole, SRC (Slip resistance on ceramic tile floor with NaLS (sodium lauryl sulphate) and on steel floor with glycerine^{^c})
- Dual density PU (Polyurethane) lightweight outsole and an insole with anti-static technology
- Heat insulation properties on the outsole up to 95° C
- Outsole with energy absorption heel.
- Removable and breathable PU and Memory Foam insole for superior comfort
- Impact resistant steel toecap rated up to 200 ± 4 Joules
- Scuff cap for extra toe reinforcement & upper protection

- Wider toecap for extra room and comfort
- Bellows tongue prevents liquids and particulates from entering the boot

Sizes: 3 - 13

Suitable Use:

- General use
- Warehouses
- Freight industry
- Mining
- Engineering
- Construction

ULTECO

CODE: DF-UBLK

NRCS/9002/217251/0321

- Conforms to EN ISO 20345:2011, NRCS/9002/217251/0321 as per SANS 20345:2014
- Full grain Buffalo leather upper
- Oil & slip resistant outsole, SRC (Slip resistance on ceramic tile floor with NaLS & on steel floor with glycerine^{^c})
- Heat insulation properties of the outsole withstands up to 95°C
- Energy absorbing heel
- Removable and breathable PU and Memory Foam insole for superior comfort
- Bellows tongue & padded collar for added comfort
- Anti-static removable in-sock
- Steel toe cap is impact resistant up to 200 ± 4J
- Wider toecap provides extra room & comfort
- Cleated outsole for additional traction
- Scuff toe over-cap for extra reinforcement
- BASF PU dual density outsole

Sizes: 3 - 13

Suitable Use:

- General use
- Warehouse environment
- Freight industry
- Mining
- Engineering
- Construction

CODE: SS1020/SHOE
NRCS/9002/271251/0006

CODE: SS1020/BOOT
NRCS/9002/271251/0004

S1 BOXER SHOE & BOOT

- Conforms to EN ISO 20345:2011
- Water resistant, split grain leather upper
- Slip resistant sole, SRC (Slip resistance on ceramic tile floor with NaLS (sodium lauryl sulphate) and on steel floor with glycerine^Λc)
- Durable & lightweight dual density PU outsole
- Cleated outsole provides additional traction on slippery surfaces
- Impact resistant steel toecap rated up to 200 ± 4 Joules
- Anti-static, reducing the hance of electrostatic discharges
- Energy absorbing heel

- Removable EVA insock
- Injected dual density polyurethane outsole

Sizes: 3 - 13

Suitable Use:

- Ideal as a boot or shoe for contract workers
- General use
- Warehouse environment
- Freight industry

ULTECO SHOE

CODE: DF-USHOE

NRCS/9002/217251/0006

- Conforms to EN ISO 20345:2011, NRCS/9002/217251/0006 as per SANS 20345:2014
- Durable Buffalo Buff leather upper
- Cleated oil & slip resistant outsole, SRC (Slip resistance on ceramic tile floor with NaLS (sodium lauryl sulphate) and on steel floor with glycerine^{^c})
- Dual density PU (Polyurethane) lightweight outsole and an insole with anti-static technology
- Heat insulation properties on the outsole up to 95° C
- Outsole with energy absorption heel
- Removable and breathable PU and Memory Foam insole for superior comfort
- Impact resistant steel toecap rated up to 200 ± 4 Joules
- Wider toecap for extra room and comfort
- Bellows tongue prevents liquids and particulates from entering the boot
- Scuff cap for extra toe reinforcement & upper protection

Sizes: 3 - 13

Suitable Use:

- General use
- Warehouse environment
- Freight industry
- Mining
- Engineering
- Construction

NOBUHLE LADIES BOOT

CODE: DF-NOBUHLE

NRCS/9002/217251/0238

- Conforms to EN ISO 20345:2011, NRCS/9002/217251/0238 as per SANS 20345:2014
- Durable Buffalo Buff leather upper
- Cleated oil & slip resistant outsole, SRC (Slip resistance on ceramic tile floor with NaLS (sodium lauryl sulphate) and on steel floor with glycerine^{^c})
- Dual density PU (Polyurethane) lightweight outsole and an insole with anti-static technology
- Heat insulation properties on the outsole up to 95° C
- Outsole with energy absorption heel
- Removable and breathable PU and Memory Foam insole for superior comfort
- Impact resistant composite toecap rated up to 200 ± 4 Joules

- Metal free lace fastenings
- Wider toecap for extra room and comfort

Sizes: 2 - 9

Suitable Use:

- General use
- Warehouse environment
- Freight industry
- Mining
- Engineering
- Construction

CHELSEA BOOTS

CODE: DF-CHELSEA

NRCS/9002/217251/0438

- Conforms to EN ISO 20345:2011, NRCS/9002/217251/0438 as per SANS 20345:2014
- Made from premium full grain Crazy Horse leather
- Steel midsole protects against penetrating surfaces and objects
- Cleated oil and slip resistant outsole, SRC (Slip resistance on ceramic tile floor with NaLS (sodium lauryl sulphate) and on steel floor with glycerine^{^c})
- Dual density PU (Polyurethane) lightweight outsole and an insole with anti-static technology
- Heat insulation properties on the outsole up to 95° C
- Outsole with energy absorption heel
- Removable and breathable PU and Memory Foam insole for superior comfort

- Impact resistant steel toecap rated up to 200 ± 4 Joules
- Wider toecap for extra room and comfort

Sizes: 3 - 13

Suitable Use:

- General use
- Warehouses
- Freight industry
- Mining
- Engineering
- Construction

NEW

SWIFT SAFETY SNEAKER SHOE

CODE: DF-SWIFT

- Conforms to EN ISO 20345:2022
- Anti-rip material upper for durability & breathability
- Metal-free construction
- Impact resistant fibreglass toecap rated up to 200 ± 4 Joules
- Cleated oil & slip resistant outsole, SR (Slip resistance on ceramic tile floor with glycerine[^]c)
- Lightweight Kevlar midsole for protection from penetrating objects
- Single density PU (Polyurethane) lightweight outsole
- Removable EVA insock for comfort & easy cleaning

Sizes: 4 - 13

Suitable Use:

- General use
- Warehouses
- Freight industry
- Engineering
- Construction

DF-FLITE

DF-FLITE-L

FIBRE LITE SAFETY SNEAKERS

CODE: DF-FLITE (MEN'S) / DF-FLITE-L (LADIES)

- Conforms to EN ISO 20345:2022
- S1P safety sneaker (energy absorption seat region, resistance to fuel and oil)
- Breathable & durable oxford mesh upper with TPR accents
- A SR oil & slip resistant outsole (Slip resistance on a ceramic tile floor with glycerine^{^c})
- Impact resistant fibreglass toecap rated up to 200 ± 4 Joules
- Lightweight Kevlar midsole for protection from penetrating objects
- Cleated EVA lightweight rubber outsole with grips for traction on terrain
- Reinforced nuback heel & TPU (Thermoplastic Polyurethane) toe bumper for added protection
- Anti-static insole reduces the chance of electrostatic discharge
- Heat insulation properties on the outsole up to 120° C
- Outsole with energy absorption heel
- Removable EVA insock for comfort & easy cleaning

- Metal Free
- Available in Men's & Ladies' options

Sizes:

Men's: 3 - 13

Ladies: 2 - 9

Suitable Use:

- General use
- Warehouses
- Freight industry
- Mining
- Engineering
- Construction

NEW

EMPEROR SMELTER BOOT

CODE: DF-EMPEROR

- High performance, metal free, superior flame retardant and electrical resistant safety boot with a metatarsal guard
- Conforms to EN ISO 20349-1:2017+A1:2020
- Protection against electrical hazard risks of 18kV in accordance with ASTM F2413-18
- Made from premium full grain European cow leather, which is flexible, waterproof, chromium VI free and durable
- Lightweight Kevlar midsole for protection from penetrating objects & heat
- A PU/nitrile rubber outsole that is lightweight, durable and aids boot temperature control
- Cleated & oil and slip resistant outsole, SRC (Slip resistance on ceramic tile floor with NaLS (sodium lauryl sulphate) and on steel floor with glycerine^{^c})
- External foot bridge metatarsal guard rated up to 100 Joules
- Contact heat resistant outsole at 300° C for 60 seconds
- Outsole with energy absorption heel
- Removable and breathable PU and Memory Foam insole for superior comfort
- Impact resistant fibreglass toecap rated up to 200 ± 4 Joules
- Wider toecap for extra room and comfort
- Slip-on design with multiple hook & loop straps for quick release

Sizes: 5 - 13

Suitable Use:

- Foundry
- Smelting
- Welding

DF-CH-GB-BLK

DF-CH-GB-WH

DRY-FIT CHELSEA GUMBOOTS

CODE: DF-CH-GB-BLK (BLACK) /DF-CH-GB-WH (WHITE)

- Recycled PVC upper and virgin PVC outsole construction
- Lightweight, durable and environmentally friendly
- Easy heel pull tab with elastic ankle gusset
- Nylon lining for ease of putting on and taking off
- Removable felt insock that is comfortable, breathable and quick drying
- Slip and grip cleated outsole
- Energy absorbing heel
- Wider toe region for a comfortable fit
- Water resistant
- Unisex design

Sizes: 4 - 12

Suitable Use:

- Agriculture
- Landscaping & gardening
- Janitorial
- Food Processing
- Mining
- Leisure wear

MIGHTY NITE GUMBOOT

CODE: DF-GB-MN

- Knee-length PVC / Nitrile gumboots
- Anti-bacterial, hygienic & lightweight
- Slip resistant outsole, SR (Slip resistance on ceramic tile floor with NaLS and on steel floor with glycerine[^]c)
- Energy absorbing heel
- Anti-static, reducing the chance of electrostatic discharges
- An oil resistant and cleated outsole providing additional traction on slippery surfaces
- A wide toe region for hours of comfort
- Reinforced shin and ankle protection
- Easy to pull off tab construction
- Average weight: 1.7 - 1.9kg's (size dependant)

Sizes: 4 - 13

Suitable Use:

- Food processing
- Butcheries
- Fisheries
- Agriculture

LADIES LITE GUMBOOT

CODE: DF-GB-LL

- Calf-length PVC / Nitrile gumboots
- Anti-bacterial, hygienic & lightweight
- Slip resistant outsole, SR (Slip resistance on ceramic tile floor with NaLS and on steel floor with glycerine[^]c)
- Energy absorbing heel
- Anti-static, reducing the chance of electrostatic discharges
- An oil resistant and cleated outsole providing additional traction on slippery surfaces
- A wide toe region for hours of comfort
- Reinforced shin and ankle protection
- Easy to pull off tab construction
- Average weight: 1.0 - 1.2kg's (size dependant)

Sizes: 3 - 9

Suitable Use:

- Food processing
- Butcheries
- Fisheries
- Agriculture

SPARTICUS GUMBOOT

CODE: DF-SP-STCM

- PVC (Polyvinyl Chloride)/Nitrile composition
- Slip resistant outsole, SRC (Slip resistance on ceramic tile floor with NaLS and on steel floor with glycerine^c)
- A penetration resistant stainless-steel midsole
- An impact resistant steel toe cap that withstands up to 200 ± 4 J, and a compression resistance of 15KN.
- Basic light chemical spray and splash protection and tested to acetic acid at a concentration of 99± 1% as per EN 13832-3:2006
- Reinforced shin, ankle, heel and toe protection
- Energy absorbing heel.
- Anti-static, reducing the chance of electrostatic discharges
- Cleated outsole for additional traction on slippery surfaces
- A broad fitting toe region allowing a comfortable fit for men and ladies feet, especially over long periods of time.

Sizes: 4 - 13

Suitable Use:

- Warehouse environments
- Agriculture
- Freight industry
- Contractors

ARMOUR GUMBOOTS

CODE: DF-ARMOUR

- PVC (Polyvinyl Chloride)/Nitrile composition
- Slip resistant outsole, SRC (Slip resistance on ceramic tile floor with NaLS and on steel floor with glycerine^c)
- Reinforced shin & ankle protection
- Energy absorbing heel
- Anti-static, reducing the chance of electrostatic discharges
- Oil resistant & cleated outsole
- Average weight: 1.9kgs

Sizes: 4 - 13

Suitable Use:

- Food Processing
- Fisheries
- Agriculture
- Janitorial

WORKWEAR SOCKS

CODE: DF-9160

- 62% Cotton, 27% Elastane, 9% Polyester
2% Polyamide
- Reinforced heel & toe for durability
- Ribbed cuff for secure fit
- Cushioned feet & sole for comfort
- Cotton & Polyester blend enhances comfort & breathability
- Perfect for all-day use

Sizes:

- Medium (4-7)
- Large (8 - 11)

Suitable Use:

- Warehousing
- Janitorial
- Gardening
- General use

FLAME RETARDANT SOCKS

CODE: DF-9162-CH-L

- Certified to EN ISO 13688:2013+A1:2021, EN 1149-5:2018 EN ISO 14116:2015
- Inherent LENZING™ FR fiber
- Anti-static
- Reinforced heel & toe for durability
- Thermally balanced & odour free
- Will not burn when exposed to heat & flame
- 48% Wool, 44% LENZING™ FR, 6% Polyamide, 2% Elasthane

Sizes: Large (8 - 11)

Suitable Use:

- Petroleum service industry
- Petrochemical industry
- Oil & gas industry
- Electrical & gas utility
- Steel mills
- Fighter pilots

BLACK

ANTI-STATIC SOCKS

CODE: DF-9161

- 64% Cotton, 9% Polyester, 4% Silver Yarn, 21% Elastane, 2% Polyamide
- Designed to safely conduct static build-up away from workers & equipment
- Anti-bacterial fibres
- Ribbed cuff for secure fit
- Elasticated arch & padded sole for extra comfort

Sizes:

- Medium (4 - 7)
- Large (8 - 11)

Suitable Use:

- Manufacturing (incl. computer equipment)
- Refineries

NAVY BLUE

We believe that all employees in any work environment are entitled to maximum safety protection and that employers should not have to compromise on the quality of the PPE products they provide for their staff.
