SAFETY FOOTWEAR

Every day, you show up and get the job done. No matter how tough the conditions, you tackle your work with confidence. Powered by high-quality safety footwear that's got your back. Because that's how it should be. And when the workday is done, it's all about what truly matters: family, friends, and making the most of life.

Work safe. Live great.

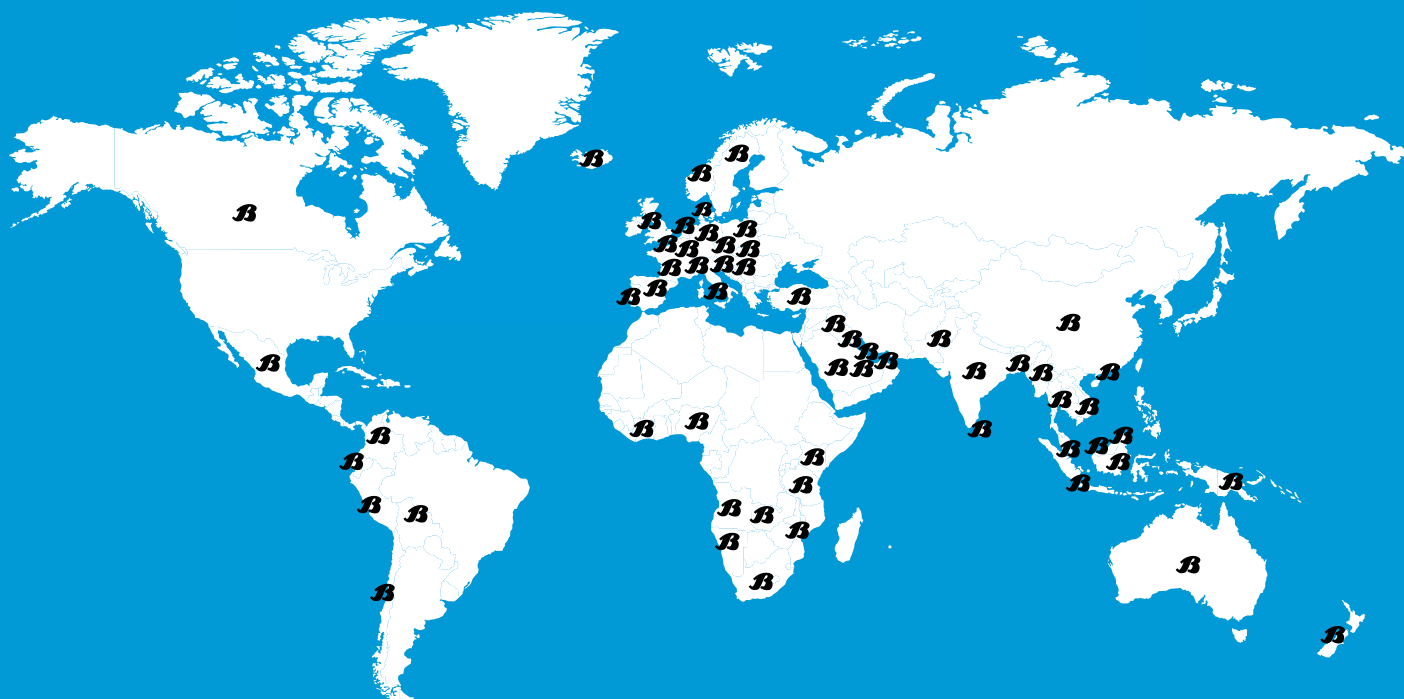

Work safe. Live great.

THE SOLE OF BATA

Founded in 1894, The Bata Shoe Organisation is one of the world's leading manufacturers and retailers of quality footwear. With over 30,000 employees, 24 production facilities, 5,000 international retail stores, and a presence in over 70 countries, the company was first registered in the town of Zlín, Czechoslovakia.

From humble beginnings, the small family business expanded rapidly under the vision and guidance of

founder Thomas Bata. Thomas, a ninth-generation shoemaker, was determined to become a manufacturer who could provide customers with value for their money. Bata became an international business in the first half of the 20th century, and by the second half of the century, it emerged as a progressive and market-leading pioneer of the modern footwear industry, now an iconic brand recognised all around the world.

BATA SOUTH AFRICA

Bata established its South African presence in 1931, in the heart of Loskop, KwaZulu-Natal. The Loskop factory is the proud manufacturer of our Toughnees and B-First school shoes, alongside a diverse range of safety shoes, producing over 5 million pairs annually.

Bata attributes its production success to the dedicated South African workforce. By producing many of our shoes locally, we have contributed to the growth of both the local and national economies, offering our customers better value for their money.

BUILDING LOCAL

With a firm belief in the power of community, Bata turned to South Africans to drive growth by investing in the Loskop community. By concentrating on localising our factory operations, Bata boosted the economy and created important job opportunities for many in Loskop. With a firm belief in the power of community, Bata turned to South Africans to drive growth by investing in the Loskop community. By concentrating on localising our factory operations, Bata boosted the economy and created important job opportunities for many in Loskop.

LOSKOP, KWAZULU-NATAL, SOUTH AFRICA

GLOSSARY

ANTISLIP

Tested to meet the standard for slip resistance.

COMPOSITE TOE CAP

Non metal toe cap offers protection against injuries and can withstand a force of up to 200 joules.

COMPOSITE MIDSOLE

Protects the foot against sharp objects penetrating through the sole.

STEEL TOE CAP

Steel toe cap offers protection against injuries and can withstand a force of up to 200 joules.
